**Raymond Voltz**

## **Palliative Care In Neurology:**

**Palliative Care in Neurology** Raymond Voltz, 2004 Palliative care is the duty of every neurologist however to date this has not been a standard feature of neurological practice or training This book helps define a new field namely palliative care in neurology It brings together all necessary information for neurologists caring for a patient with advance disease Palliative care is an approach to the management of patients with life threatening illness that attempts to enhance comfort relieve psychosocial and spiritual distress assure respect for decision making provide support for the family and prepare the patient and family for the end of life This unique book covers each of the many dimensions of palliative care as they relate to patients with advanced neurological disorders Basic principles of palliative care and specific ethical issues such as euthanasia food and hydration and advance directives are covered The needs of populations with specific neurological disorders are described and the management of symptoms that are common to all is explored in detail Each chapter introduces its topic using a case report that may be used directly for teaching purposes The authors have put together an invaluable resource which lays the foundation for further research in the field

**Neuropalliative Care** Claire J. Creutzfeldt, Benzi M. Kluger, Robert G. Holloway, 2018-10-01 This comprehensive guide thoroughly covers all aspects of neuropalliative care from symptom specific considerations to improving communication between clinicians patients and families Neuropalliative Care A Guide to Improving the Lives of Patients and Families Affected by Neurologic Disease addresses clinical considerations for diseases such as dementia multiple sclerosis and severe acute brain injury as well discussing the other challenges facing palliative care patients that are not currently sufficiently met under current models of care This includes methods of effective communication supporting the caregiver how to make difficult treatment decisions in the face of uncertainty managing grief guilt and anger and treating the pain itself Written by leaders in the field of neuropalliative care this book is an exceptional well rounded resource of neuropalliative care serving as a reference for all clinicians caring for patients with neurological disease and their families neurologists and palliative care specialists physicians nurses chaplains social workers as well as trainees in these areas

**Neuropalliative Care**, 2022-08-31 Neuropalliative Care Part One Volume 190 covers a type of care that is given when there is no cure for the neurological disorder and the patient is in distress It provides a scholarly background of neuropalliative care from historic underpinnings to its practice in various geographical regions along with best practices for specific neurological disorders It covers the work of multi or interdisciplinary teams whose care is intended to make the patient as comfortable as possible and includes partners and families in treatment plans Summarizes research in neuropalliative care Identifies current practices in different geographic regions Provides best practices for specific neurological disorders and patient populations Includes advanced care planning

**Case Studies in Neuropalliative Care** Maisha T. Robinson, 2018-06-28 With the growth of neuropalliative care as a rapidly emerging subspecialty in neurology it is essential that clinicians develop core skills to offer high quality patient centred care This book captures the essence of

palliative care in Neurology highlighting abundant opportunities to incorporate key principles into patients management plans Through a pragmatic case based format with suggested references for readers to expand their knowledge on a range of topics this guide explores didactic opportunities From patients facing challenging end of life decisions families struggling to determine the treatment intensities to clinicians leading difficult conversations these cases are straightforward and relatable Demonstrating the breadth of palliative care opportunities occurring on the spectrum of neurologic disease this essential toolkit supports clinicians at all levels providing assistance for patients who have chronic progressive or terminal neurologic diseases Compelling and thought provoking this guide highlights the many opportunities to ease suffering and to improve quality of life

**Palliative Care in Neurological Disease** Judi Byrne,2009 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging However only in recent years has serious attention been paid to palliative care approaches for people affected by conditions other than cancer This unique and comprehensive book builds bridges between palliative and neurological care expertise recognising that such people may require intensive input from rehabilitation and therapy teams at the same time as complex symptom management and supportive non clinical care Its comprehensive guidance on managing these complex conditions aims to enable those living with them to enjoy the best quality of life for as long as possible

Palliative Care in Neurological Disease Judi Byrne,Penny McNamara,Jane Seymour,Pam McClinton,2021-12-16 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging

**Palliative Care in Neurology** Robinson,2023-04-15 *Long-term Neurological Conditions* ,2008 These guidelines are intended to inform doctos and healthcare professionals involved in the long term support rehabilitation and palliative care of people in the later stages of long term neurological conditions

*Palliative Care in Amyotrophic Lateral Sclerosis (motor Neurone Disease)* David Oliver,Gian Domenico Borasio,Declan Walsh,2000 Although new treatments for amyotrophic lateral sclerosis motor neurone disease are being developed these at present offer only the potential to slow the disease process Therefore a palliative care approach to the care of the patient and their family is at the center of good clinical practice in ALS MND This book aims to provide and evidence based guide to the care of people with ALS MND including the control of symptoms the psychosocial care of patients and their families and care in bereavement The palliative care approach to the care of ALS MND is outlined and the role of the multidisciplinary team emphasized The international authorship are from many different disciplines and are all closely involved in the care of ALS patients giving a depth of practical knowledge and experience and allowing a comparison of the differences across cultures social circumstances health care systmes and nations All contributors are clinicians involved in the care of people with ALS MND and they are able to

provide clear guidelines of the care throughout the disease process from telling of the diagnosis to death The experience of patients and families are considered and case studies are provided to show the practical applications of the theoretical knowledge An evidence based approach grounded in day to day care of patients is used Different models of care are explored and the interaction of palliative care with other treatment regimes is addressed as the experience from the treatment of cancer has shown that there may easily be areas of conflict and confusion if there is a lack of clarity in the care provided for patients The book aims to provide a reference for all involved in the care of patients with ALS MND including neurologists general physicians rehabilitationists paramedical staff general family practitioners and specialist palliative care teams The care of a patient with ALS MND and their family is often a challenge but one all should take up so that patients can live life as fully as possible Palliative Care in Neurology, Volume II Raymond Voltz,Marianne De Visser,David John

Oliver,2022-03-11 **Palliative Care in Neurology** Raymond Voltz,Marianne de Visser,David Oliver,2020-03-10 Over the last 50 years palliative care has usually been associated with cancer patients but more recently there has been increased discussion of the role of palliative care for neurological patients In the past years neurology has moved from being a purely diagnostic area to a very therapeutically active one A further step needs to be taken to modify the therapeutic activity from cure to care depending on the patient s disease trajectory Palliative care has been associated with care at the end of life whereas it may be appropriate earlier in the disease progression and will extend after death in the support of bereaved families The care of patients with neurological disease and their families will encompass the psychological spiritual and existential issues and neurologists and the teams in which they work should develop skills to consider all aspects of care in order to maximize the quality of life of all involved and enable patients to die peacefully **Neuropalliative Care**,2023-01-03 Neuropalliative Care Part Two Volume 191 covers a type of care that is given when there is no cure for the neurological disorder and the patient is in distress It provides a scholarly background of neuropalliative care from historic underpinnings to its practice in various geographical regions along with best practices for specific neurological disorders It covers the work of multi or interdisciplinary teams whose care is intended to make the patient as comfortable as possible and includes partners and families in treatment plans Summarizes research in neuropalliative care Identifies current practices in different geographic regions Provides best practices for specific neurological disorders and patient populations Includes advanced care planning **Neurological Conditions** National Council for Palliative Care (Great Britain),2006-01-01

*End of Life Care in Neurological Disease* David Oliver,2012-11-27 As end of life care is extended to more and more people it is increasingly important that people with progressive neurological disease are recognised as having particular issues as their disease progresses This group of people with advancing motor neurone disease multiple sclerosis Parkinson s disease multiple systems atrophy progressive supranuclear palsy Huntington s disease and other progressive neurological disease face increasing problems with physical symptoms and psychosocial and spiritual issues for both themselves and their

families and carers This book encourages health and social care professionals to become closely involved in the care of these people and their families so that advance care plans can be started and quality of life maintained This book addresses the principles and practice of developing end of life care strategies for neurological disease written with a clinical multidisciplinary focus and illustrated with detailed case studies **Palliative Neurology** Ian Maddocks, Bruce Brew, Heather Waddy, Ian Williams, 2005-11-17 Palliative care affirms the value of holistic support for persons facing death from advanced disease This handbook aims to provide succinct and practical advice on the management of major neurological disorders in both their supportive and terminal phases recognizing that these conditions are increasing in prevalence in virtually every society as the proportion of elderly persons grows It demonstrates how the discomforts encountered in dementia stroke Parkinson s disease ALS Huntington s disease muscular dystrophies and multiple sclerosis can benefit from the same comprehensive approach to palliation as has evolved in specialist care for cancer **Palliative Care in Neurological Disease** Judi Byrne, 2009 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life **Palliative Care in Amyotrophic Lateral Sclerosis** David Oliver, Gian Domenico Borasio, Wendy Johnston, 2014 This volume provides an evidence based guide to the care of people with ALS MND including the control of symptoms the psychosocial care of patients and their families and care in bereavement **Bradley and Daroff's Neurology in Clinical Practice - E-Book** Joseph Jankovic, John C.
