which at this point await shipment on some of the many steamboats which ply back and forth upon the river and here are landed by almost every steamer goods and chattels for the many families which are hidden in the shaddows of the forests that clothe the river s shore In sight are scarce a dozen houses all told but far back for a radius of ten or fifteen miles are scattered farmhouses whence come tributes of produce to this point Hundreds of barrels of oranges boxes of tomatoes and early vegetables grapes peaches and pomegranates here pause on their way to the Jacksonville market One morning as the Professor and I were enjoying our morning stroll on the little wharf an unusual sight met our eye a bale of cotton long and large pressed hard and solid as iron and done up and sewed in a wholly workmanlike manner that excited our surprise It was the first time since we had been in Mandarin a space of some four or five years that we had ever seen a bale of cotton on that wharf Yet the whole soil of East Florida is especially adapted not only to the raising of cotton but of the peculiar long staple cotton which commands the very highest market price But for two or three years past the annual ravages of the cotton worm had been so discouraging that the culture of cotton had been abandoned in despair Whence then had come that most artistic bale of cotton so well pressed so

**Palmetto-Leaves, by Harriet Beecher Stowe.** Harriet Beecher Stowe, 2006-09

Palmetto Leaves is a memoir and travel guide written by Harriet Beecher Stowe about her winters in the town of Mandarin Florida published in 1873 Already famous for having written Uncle Tom's Cabin 1852 Stowe came to Florida after the U S Civil War 1861-1865 She purchased a plantation near Jacksonville as a place for her son to recover from the injuries he had received as a Union soldier and to make a new start in life After visiting him she became so enamored with the region she purchased a cottage and orange grove for herself and wintered there until 1884 even though the plantation failed within its first year

Parts of Palmetto Leaves appeared in a newspaper published by Stowe's brother as a series of letters and essays about life in northeast Florida

Scion of New England clergy Stowe keenly felt a sense of Christian responsibility that was expressed in her letters She considered it her duty to help improve the lives of newly emancipated blacks and detailed her efforts to establish a school and church in Mandarin toward these ends

Parts of the book relate the lives of local African Americans and the customs of their society Stowe described the charm of the region and its generally moderate climate but warned readers of excessive heat in the summer months and occasional cold snaps in winter

Her audience comprises relatives friends and strangers in New England who ask her advice about whether or not to move to Florida which at the time was still mostly wilderness

Although it is a minor work in Stowe's oeuvre Palmetto Leaves was one of the first travel guides written about Florida and stimulated Florida's first boom of tourism and residential development in the 1880s

By the time Harriet Beecher Stowe 1811-1896 moved to Florida in 1867 she was already internationally famous for authoring Uncle Tom's Cabin published as a serial between 1851 and 1852

The novel expounded upon her abolitionist views and was extraordinarily influential in condemning slavery in the United States

Stowe's opposition to slavery sprang from a moral passion based on her Christian faith She had grown up the daughter of a Presbyterian minister Lyman Beecher seven of her brothers became ministers in Calvinist or Congregational denominations and she married a minister In 1860 Stowe's son Frederick Fred William Stowe enlisted in the First Massachusetts Infantry Regiment when Abraham Lincoln called for volunteers in anticipation of the Civil War

Much beloved yet troubled Fred Stowe had developed a problem with alcohol as early as sixteen He took to army life however and was promoted to lieutenant After receiving a head wound at the Battle of Gettysburg in 1863 he endured severe headaches and was forced to resign his commission

His alcoholism worsened and he may have compounded it with a liberal use of opiates and narcotics which were widely available In 1866 Fred encountered two young farmers in Connecticut who had spent time on duty as Union soldiers in Florida during the war He learned from them that land there was plentiful and cheap and many recently emancipated blacks were available at low wages to work it

When he shared this information with his mother Stowe and her husband Calvin Ellis Stowe considered it a prime opportunity to hasten their son's rehabilitation

barriers for armies and carried disease yet also provided medicine and raw materials necessary to implement war greatly influencing the day to day life of soldiers and civilians Of the thousands of books written about the Civil War few mention the environment and none address the topic as a principal theme In *Flora and Fauna of the Civil War* Kelby Ouchley blends traditional and natural history to create a unique text that explores both the impact of the Civil War on the surrounding environment and the reciprocal influence of plants and animals on the war effort The war generated an abundance of letters diaries and journals in which soldiers and civilians penned descriptions of plants and animals sometimes as a brief comment in passing and other times as part of a noteworthy event in their lives Ouchley collects and organizes these first person accounts of the Civil War environment adding expert analysis and commentary in order to offer an array of fascinating insights on the natural history of the era After discussing the physical setting of the war and exploring humans attitudes toward nature during the Civil War period Ouchley presents the flora and fauna by individual species or closely related group in the words of the participants themselves From ash trees to willows from alligators to white tailed deer the excerpts provide glimpses of personal encounters with the natural world during the war revealing how soldiers and civilians thought about and interacted with wild flora and fauna in a time of epic historical events Collectively no better sources exist to reveal human attitudes toward the environment in the Civil War era This one of a kind reference book will spark widespread interest among Civil War scholars writers and enthusiasts as well as environmental historians     [Palmetto-Leaves](#) Harriet Beecher Stowe,2016-05-17 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant     **Liquid Landscape** Michele Currie Navakas,2017-08-28 In Florida land and water frequently change places with little warning dissolving homes and communities along with the very concepts of boundaries themselves While Florida's landscape of saturated swamps shifting shorelines coral reefs and tiny keys initially impeded familiar strategies of early U S settlement such as the establishment of fixed dwellings sturdy fences and cultivated fields over the course of the eighteenth and nineteenth centuries Americans learned to inhabit Florida's liquid landscape in unconventional but no less transformative ways In *Liquid Landscape* Michele Currie Navakas analyzes the history of Florida's incorporation alongside

the development of new ideas of personhood possession and political identity within American letters From early American novels travel accounts and geography textbooks to settlers guides maps natural histories and land surveys early American culture turned repeatedly to Florida s shifting lands and waters as well as to its itinerant enclaves of Native Americans Spaniards pirates and runaway slaves This preoccupation with Floridian terrain and populations argues Navakas reveals a deep American concern with the challenges of settling a region so exceptional in topography geography and demography Navakas reads a vast archive of popular literary and reference texts spanning Revolution to Reconstruction including works by William Bartram James Fenimore Cooper and Harriet Beecher Stowe to uncover an alternative history of American possession one that did not descend exclusively or even primarily from the more familiar legal political and philosophical conceptions of American land as enduring solid and divisible The shifting southern edge of early America produced a new language of settlement belonging territory and sovereignty and that language would ultimately transform how people all across the rapidly changing continent imagined the making of U S nation and empire *Palmetto Leaves (1873)*.
