The Panavia Tornado is a family of twin engine combat aircraft which was jointly developed by the United Kingdom West Germany and Italy. There are three primary versions of the Tornado: the Tornado IDS Interdictor Strike fighter/bomber, the suppression of enemy air defenses Tornado ECR Electronic Combat Reconnaissance, and the Tornado ADV Air Defence Variant interceptor. Developed and built by Panavia, the Tornado first flew on 14 August 1974 and saw action with the RAF, AMI (Italian Air Force) and Royal Saudi Air Force in the Gulf War. International cooperation continued after its entry into service within the Tri-National Tornado Training Establishment, a tri-nation training and evaluation unit operating from RAF Cottesmore, England. Including all variants, 992 aircraft were built for the three partner nations and Saudi Arabia. This monograph on this European fighter/bomber contains 118 color photos with English and Polish photo captions, featuring external and internal views and 3 color profiles. Also included is a free decal sheet and high-quality masking foil.

**The Panavia Tornado at Low-Level** Scott Rathbone, 2024-11-30. The small group of enthusiasts and photographers who had braved the winter weather and gathered on the slopes of the Lake District's iconic valleys on Wednesday 9 January 2019 were witnesses to the end of an era. The RAF Tornado GR 4 that raced past them in some cases at a lower altitude than the onlookers made the last ever low-level flight by this aircraft in the United Kingdom Low Flying System. Never again would the Mighty Fin, an aircraft that had been a familiar sight among the valleys of the UK for around forty years, provide such a spectacle. First flown in August 1974, the Tornado arguably became one of the RAF's most important aircraft of the Cold War. Indeed, the Tornado was the mainstay of RAF strike aircraft from its early days as a nuclear-capable low-level interdiction strike fighter (the GR 1) in RAF service through to its retirement as a more versatile medium-to-high-level strike fighter (the GR 4). Along with the shorter-lived Air Defense Variant (the F 2/F 3), the Tornado was without doubt one of the best-loved aircraft types amongst photographers and crews, with the sheer number of the initial GR 1s allowing them to populate eleven front-line squadrons as well as the training units of the Tri-National Tornado Training Establishment and the Tornado Weapons Unit. Altogether, over twenty units flew variants of the type in the RAF alone. The Tri-National Tornado Training Establishment also catered for the other partner nations of Germany and Italy, with all crews finding their way into the United Kingdom Low Flying System on a regular basis. It was in fact the impending introduction of the Tornado and the resulting increase in low-level activity that forced a restructuring of the UKLFS in 1979. In this book, Scott Rathbone provides a pictorial record of the Tornado in its element, that of low-level flight.
