materials and facts together with the visual aspect of the pictures Children are entertained with the coolness factor of the discovery book plus they learn some new and a little bit harder to retain facts simultaneously with the cool stuff and this is how the child is going to retain all of the information Price Guide to Contemporary Collectibles and Limited Editions ,2000 **The 2002 Price Guide to Limited Edition Collectibles** Mary L. independently is where intelligence starts to develop and grow into a totally new dimension If your child asks lots of questions you actually have the proof that providing discovery books to your child actually works because children who discover with their own senses and in an active and interactive way are able to develop intelligence on a much higher level than children who are not asking any questions and who are passively sitting in front of a TV all day long Stimulation of thought and contemplation increases intelligence and the brain power and TV kills the brain cells of your child Parents and homeschoolers alike are reporting unprecedented results from using her books as learning materials and they get results even with children who usually hate reading books and who have problems learning and retaining new and dry information Note This book is suitable for children ages 5 or older perfect kids book goodnigh
