Papers in Structural and Transformational Linguistics Zellig S. Harris, 2013-12-01 Papers in structural and transformational linguistics, 1970 **Vol.1. Papers in structural and transformational linguistics** Zellig Sabbettai Harris, 1970 *Papers on Syntax* Z. Harris, 2012-12-06 The selection of papers reprinted here traces the development of syntax from structural linguistics through transformational linguistics to operator grammar. These three are not opposing views or independent assumptions about language. Rather they are successive stages of investigation into the word combinations which constitute the sentences of a language in contrast to those which do not. Throughout the goal has been to find the systematicities of these combinations and then to obtain each sentence in a uniform way from its parts. In structural analysis the parts were words simple or complex belonging to particular classes or particular sequences of these. In transformational analysis it is found that the parts of a sentence are elementary sentences whose parts in turn are simple words of particular classes. The relation between these two analyses is seen in the existence of an intermediate stage between the two presented in paper 4 From Morpheme to Utterance. A further intermediate stage is presented in the writer's String Analysis of Sentence Structure. *Papers on Formal Linguistics* I. Mouton The Hague 1962 though it was developed after transformations as a syntactic representation for computational analysis. Generalization of both of these analyses leads to operator grammar in which each sentence is derived in a uniform way as a partial ordering of the originally simple words which enter into it. Each step least upper bound of the partial ordering of a word requiring another forms a sentence which is a component of the sentence being analyzed. **Michel Pêcheux: Automatic Discourse Analysis** Michel Pêcheux, 2022-05-20 This volume offers the long awaited overview of the work of the French philosopher and discourse analyst Michel Pêcheux who was the leading figure in French discourse analysis until his death in 1983. The volume presents the first English publication of the work of Pêcheux and his coworkers on automatic discourse analysis. It is presented with extensive annotations and introductions written by former colleagues such as Françoise Gadet, Paul Henry and Denise Maldidier. Outside France French discourse analysis is almost exclusively known as the form of philosophical discourse presented by such authors as Michel Foucault and Jacques Derrida. The contemporary empirical forms of French discourse analysis have not reached a wider public to the degree they deserve. Through its combination of original texts, annotations and several introductory texts, this volume facilitates an evaluation of both results and weaknesses of French discourse analysis in general and of the work of Michel Pêcheux and his coworkers in particular. **Automatic Discourse Analysis** Michel Pêcheux, 1995 This volume offers the long awaited overview of the work of the French philosopher and discourse analyst Michel Pêcheux who was the leading figure in French discourse analysis until his death in 1983.
