[The Philosophical Defence of Psychiatry](#) , **Helix Network Theory** Runyuan Gan, 2023-02-08 Based on the philosophy of Systems Science and the law of evolution theory, the book, by applying the methods of structural functionalism, divides the modern social system into human culture, economy, polity, science, law, education, and other sub-systems through the systematic synthesis of disciplines such as economics, sociology, management, politics, culture, theories, history, and philosophy, and explores the connection between these sub-systems and their intricate relation with social progress, thus depicting the historical trajectory of the long-term evolution of the human social system. Starting from the actual production and operation of the firms, the author systematically analyses the organic connections and sophisticated operating process of social reproduction in modern society from micro, meso, and macro, revealing the dynamic structure and evolutionary laws of the social economic system. This book reveals the fractal features such as self-similarity, hierarchy, and recursiveness in the general structure of the firm system, the sector system, and the national economic system, thereby integrating micro, meso, and macro economics into a unified theoretical framework. This integration is interdisciplinary and has gone beyond the economics. It can be regarded as the fourth grand synthesis in the history of economics after John Stuart Mill 1806-1873, Alfred Marshall 1842-1924, and Samuelson 1915-2009.
