*Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination: Book 5: Khayyami Theology*  
Mohammad H. Tamdgidi, 2022-05-01

Omar Khayyam's Secret Hermeneutics of the Robaiyat in Quantum Sociological Imagination by Mohammad H. Tamdgidi is a twelve book series of which this book is the fifth volume subtitled Khayyami Theology. The Epistemological Structures of the Robaiyat in All the Philosophical Writings of Omar Khayyam Leading to His Last Keepsake Treatise. Each book independently readable can be best understood as a part of the whole series. In Book 5 to understand the theological epistemology or way of knowing God framing Khayyam's Robaiyat as spread out in all his philosophical works. Tamdgidi further offers the texts and his updated Persian and new English translations and analyses of six primary writings that preceded Khayyam's last keepsake treatise on the universals of existence. 1. Khayyam's annotated Persian translation of Avicenna's sermon in Arabic on God and creation. 2. Khayyam's treatise in Arabic addressed to Nasawi, wrongly regarded as an Avicenna pupil on the created world and worship duty. 3. 5. Khayyam's three treatises in Arabic all addressed to Abu Taher to whom Khayyam also dedicated his treatise on algebra that are separate chapters of a three part treatise on existence on topics ranging from the necessity of contradiction determinism survival attributes of existents and the light of intellect on existent as the subject matter of universal science and 6. Khayyam's treatise in Arabic addressed to Moshkavi a supportive Shia intellectual in response to three questions on soul's survival on the necessity of accidents and on the nature of time. The most fruitful way of understanding Khayyam's six texts is by regarding them as efforts made at defending his succession order thesis implicitly revealed when commenting on Avicenna's sermon and finalized in his last keepsake treatise. The texts served to offer the theological epistemology behind Khayyam's thesis revealing his creative conceptualist view of existence that informed his poetic way of going about knowing God creation and himself within a unitary Islamic creationist evolutionary worldview. Khayyam's way of knowing God and existence is non dualistic non atomistic and unitary in worldview allowing for subject included objectivity probabilistic determinism transcontinuous or discontinuous creative causality transdisciplinarity and transculturalism. It thus fulfills in a prescient way all the eight attributes of the quantum vision. Poetry is most conducive to unitary knowing and subject included objectivity must necessarily be self reflective and thus engage intellective emotional and sensible modes of knowing. This explains why Khayyam transcended scholastic learning in favor of a poetic encounter with reality. What he meant by Drunkenness calling it the highest state of mind known to him can thus be best understood as a unitary quantum state of mind achieved by way of his poetry as a meditative art of self purification. The goal metaphorically is to move from a way of knowing things as divisible grapes to a pure and unitary way of knowing them as indivisible Wine paralleling what we call today moving from chunky Newtonian toward unitary quantum visions of reality. The key for entering Khayyam's secret tent is realizing that what he primarily meant by Wine in his Robaiyat was self referentially his Robaiyat itself a key openly hidden therein thanks to his

theological epistemology For him the Robaiyat was a lifelong work on himself serving also human spiritual awakening to its place and duty in the succession order of God's creation It also served his aspiration for a lasting soul He knew the now proven worth of his secret magnum opus and that is why he so much praised his Wine About OKCIR i Published to Date in the Series ii About this Book iv About the Author viii Notes on Transliteration xvii Acknowledgments xix Preface to Book 5 Recap from Prior Books of the Series 1 Introduction to Book 5 Exploring the Theological Epistemology of the Robaiyat in Omar Khayyam's Philosophical Treatises 7 CHAPTER I Omar Khayyam's Annotated Persian Translation of Avicenna's Splendid Sermon in Arabic on God's Unity and Creation The Manuscript with a New English Translation Followed by Comparative Textual Analysis 17 CHAPTER II Omar Khayyam's Treatise on the Created World and Worship Duty The Arabic Manuscript with Updated Persian and New English Translations Followed by Textual Analysis 85 CHAPTER III Part 1 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding the Necessity of Contradiction Determinism and Survival The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 175 CHAPTER IV Part 2 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding Attributes The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 237 CHAPTER V Part 3 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding the Light of Intellect on Existence as the Subject Matter of Universal Science The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 305 CHAPTER VI Omar Khayyam's Treatise Addressed to Moshkavi in Response to Three Questions on Soul's Survival the Necessity of Accidents and the Nature of Time The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 347 CHAPTER VII From Grapes to Wine Khayyam's Unitary Way of Knowing Integratively Understanding the Structures of Omar Khayyam's Theological Epistemology in the Robaiyat as Spread Out in All His Philosophical Writings 409 Conclusion to Book 5 Summary of Findings 483 Appendix Transliteration System and Book 5 Glossary 513 Book 5 Cumulative Glossary of Transliterations 526 Book 5 References 535 Book 5 Index 541

### **The Meaning of the Terms:**

**'existence' and 'reality'** Alvin Thalheimer, 1920      **The Meaning of Human Existence** Leslie Paul, 1950 In the middle of the Twentieth Century it is hard to remember a time when the mind and spirit of man were untroubled by doubt of himself and of the relation to the universe around him Two world wars a series of gigantic social upheavals and an increasing mechanized civilization have gone far to destroy that faith in himself which is the very foundation of the Christian ethic The result has been the growth of materialistic philosophies which deny that faith explicitly while leaving the soul of man tortured and barren Amid the confusion and torment of contemporary thought Leslie Paul raises a banner of hope In The Meaning of Human Existence he has written a book from the viewpoint of the practising Christian which argues the Christian case in terms acceptable to minds trained to the scientific scepticism of the age He does this only after subjecting the opposition's case to the closest intellectual scrutiny The result is a magnificent vindication of the dignity of man The three parts of the

book deal respectively with the physical world with human nature and with Christian revelation The teaching of such figures as St Augustine Kant and Kierkegaard in philosophy Freud and Krafft Ebing in psychology and such scientists as Darwin Huxley and Einstein is illuminated by the author s fresh mind and lively style in a way which makes the contributions of each readily understandable The Meaning of Human Existence is thus an exceptionally clear and stimulating guide through the complex patterns of modern thought Publisher **Thought and Things** James Mark Baldwin,1906 What Caused the Big Bang? Rem Blanchard Edwards,2001 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies incl Steady State Oscillationism Big Fizz that affirm the eternity self sufficiency of the universe without God It defends and revises Process Theology and arguments for God s existence from the universe s life supporting order contingent existence *Private Fleming at Chancellorsville* Perry Lentz,2006 What intelligent person has never pondered the meaning of life For Yuval Lurie this is more than a puzzling philosophical question it is a journey and in this book he takes readers on a search that ranges from ancient quests for the purpose of life to the ruminations of postmodern thinkers on meaning He shows that the question about the meaning of life expresses philosophical puzzlement regarding life in general as well as personal concern about one s own life in particular Lurie traces the emergence of this question as a modern philosophical quandary riddled with shifts and turns that have arisen over the years in response to it Tracking the Meaning of Life is written as a critical philosophical investigation stretching over several traditions such as analytic philosophy phenomenology and existentialism It maps out a journey that explores pivotal responses to this question drawing especially on the thought of Tolstoy Wittgenstein Sartre and Camus and exploring in depth the insights these thinkers offer regarding their own difficulties concerning the meaning of life In the book s four sections Lurie discusses Tolstoy s challenge to experience the religious and transcendental meaning of life by choosing a simple hardworking existence Wittgenstein s focus on ethics and discovering the sense of the world his conclusion that the question of the meaning of life makes no sense and his turning to experience the mystical aspect of the world Sartre s positing of freedom as the basis of human life stipulating a personal answer to the question of the meaning of life and Camus view of the absurdity of life unalleviated by any personal meaning Guided by these views Lurie imparts new insight to ideas that underlie our concern with life s meaning such as the difference between attitudes toward life and beliefs and opinions about life the meaning of words versus the meaning of events shared meanings versus personal meanings and the link between ethics and personal identity Tracking the Meaning of Life is no mere dry philosophical study but a journey that dramatically illustrates the poignancy of the quest for meaning showing that along the way it gradually becomes more obvious how personal meaning may be found in the pulsations of everyday life The book offers stimulating reading not only for scholars in philosophy but also for general readers who wish to see how their personal concerns are echoed in modern philosophical thought More than a description of a journey it is a map to anxieties and puzzlements we all face pointing to

ideas that can guide readers on their own search for meaning *Thought* Walter Sylvester Gamertsfelder,1920

Introduction to a Phenomenology of Life Renaud Barbaras,2022-01-04 In Introduction to a Phenomenology of Life renowned French philosopher Renaud Barbaras aims to construct the basis for a phenomenology of life Called an introduction because it has to deal with philosophical limits and presuppositions it is much more as Barbaras investigates life in its phenomenological senses approached through the duality of its intransitive and transitive senses Originally published in French Introduction une ph nom nologie de la vie Introduction to a Phenomenology of Life first defines the problem of life phenomenologically then studies the failures of the phenomenological movement to adequately think about life and finally elaborates a new original and productive approach to the problem Combining original interpretations and expert readings of philosophers such as Heidegger Henry Bergson and Merleau Ponty Barbaras offers a powerful and important contribution to phenomenology and continental thought Solipsism, Physical Things and Personal Perceptual Space Safak

Ural,2019-09-30 Solipsism indicates an epistemological position that denies the existence of others by asserting that the self is the only thing that can be known to exist For sophist philosophers the belief that we can not know anything and even if we do so we cannot communicate it is central to this theory However until now there has been little academic scholarship that has tried to provide answers to the pressing issues raised by solipsism In Solipsist Ontology Physical Things and Personal Perceptual Space Ural aims to redefine solipsism by analyzing and elaborating on traditional philosophical problems such as empiricism and rationalism as well as discussing problems of language communication and meaning Ural reveals where solipsism has been previously ignored pseudo problems have arisen that disguise the sources of the problems with prejudices that concern the philosophical problems in question Notably many current as well as traditional problems of ontology epistemology and language are bound up in discourses of solipsism Ural argues that discarding solipsism as a philosophical discourse hinders new interpretations of traditional philosophical thought This book offers a fresh perspective to solipsism by defining it in relation to concepts such as physical things personal perceptual space and identity Importantly Ural proposes that an understanding of identity is not necessary in order to redefine solipsism By building a logical system that fashions communication and solipsism as interrelated it is possible to reject identity as a useless concept and thus overcome the classic solipsist dilemma of we are not able to communicate This original piece of research is an important and timely contribution to the field of philosophy that will be of great interest to teachers researchers and students **Everything and Nothing**

Graham Priest,Markus Gabriel,2022-09-15 Is it possible for reality as a whole to be part of itself Can the world appear within itself without thereby undermining the consistency of our thought and knowledge claims concerning more local matters of fact This is a question on which Markus Gabriel and Graham Priest disagree Gabriel argues that the world cannot exist precisely because it is understood to be an absolutely totality Priest responds by developing a special form of mereology according to which reality is a single all encompassing whole everything which counts itself among its denizens

Their disagreement results in a debate about everything and nothing Gabriel argues that we experience nothingness once we overcome our urge to contain reality in an all encompassing thought whereas Priest develops an account of nothing according to which it is the ground of absolutely everything A debate about everything and nothing but also a reflection on the very possibility of metaphysics
