**The Conceptual Foundations of Contemporary Relativity Theory** John Cowperthwaite Graves, 1971. The central conceptual idea of the contemporary theory of general relativity or geometrodynamics is the identification of matter with the structure of space-time. No entities foreign to space-time like masses, charges, or independent fields are needed, and physics thus becomes identical with the geometry of space-time. This idea implies a philosophical description of the universe that is monistic and organic, characterized by an all-encompassing interdependence of events. Moreover, it is an idea with deep roots in the history of philosophy. For these reasons, the author of this important study strives to clarify these philosophical and historical issues before proceeding to the details of the physical theory of geometrodynamics.

Does the White House tweet? Or does the White House post on Twitter? Can "text" be a verb and also a noun? When should you link? For anyone who writes short stories or business plans, book reports, or news articles, knotty choices of spelling, grammar, punctuation, and meaning lurk in every line. Lay or lie? Who or whom? That or which? Is Band-Aid still a trademark? It's enough to send you in search of a Martini. Or is that a martini? Now everyone can find answers to these and thousands of other questions in the handy alphabetical guide used by the writers and editors of the world's most authoritative news organization. The guidelines to hyphenation, punctuation, capitalization, and spelling are crisp and compact, created for instant reference in the rush of daily deadlines. The 2015 edition is a revised and condensed version of the classic guide, updated with solutions to problems that plague writers in the Internet age. How to cite links and blogs. How to handle tweets, hashtags, and other social media content. How to use current terms like transgender or to choose thoughtfully between same-sex marriage and gay marriage. With wry wit, the authors have created an essential and entertaining reference tool.
