Jones, Randall M. Schoonover, 2002-03-26 How much does it weigh seems a simple question To scientists and engineers however the answer is far from simple and determining the answer demands consideration of an almost overwhelming number of factors With an intriguing blend of history fundamentals and technical details the Handbook of Mass Measurement sets forth the details of achieving the highest precision in mass measurements It covers the whole field from the development calibration and maintenance of mass standards to detailed accounts of weighing designs balances and uncertainty It addresses the entire measurement process and provides in depth examinations of the various factors that introduce error Much of the material is the authors own work and some of it is published here for the first time Jones and Schoonover are both highly regarded veterans of the U S National Institute of Standards and Technology With this handbook they have provided a service and resource vital to anyone involved not only in the determination of mass but also to the entire field of precision measurement **User/procurement Manual for Retardant Measurement Mass Flowmeter**, 1997 *Measuring Mass and Weight* Barbara A. energy produced in x ray burst is investigated using a complex supercomputer simulation Based on the results the importance in astrophysics of having precision measurements over theoretical predictions and high performance simulations over simple approximations is discussed With the transition from the National Superconducting Cyclotron Laboratory NSCL to the Facility for Rare Isotope Beams FRIB a plethora of rare isotopes previously beyond the reach of nuclear physicists due to low production rates and short half lives have become available To measure the masses of these exotic isotopes new tools have been implemented at LEBIT The Phase Imaging Ion Cyclotron Resonance PI ICR Technique is one of these tools and it has vastly improving experimental sensitivity As with any technique requiring parts per billions level precision it is full of complications in hardware software and understanding of systematic uncertainties These challenges and how they have been overcome will be discussed Finally preliminary results of PI ICR proof of effectiveness will be shown successful PI ICR mass measurements of two rare isotopes produced by FRIB the previously known  $^{105}\text{Sn}$  and the world's first mass measurement of  $^{22}\text{Al}$
