Assess and Review Ann Montague-Smith, Paul Harrison, 2003 Assess and Review is a complete resource for assessing children's learning. It provides a variety of activities for each key objective allowing teachers the flexibility to consolidate then review a child's progress. Each teacher's book stands alone or works with any published core maths programme. Each title includes mental and oral activities, games and mental and written tests. Machine Shop Calculations Fred Herbert Colvin, 1908 Handbook for Machine Shop and Drafting Room, 1914 Compendium of tables, standards and data on every operation relating to machinery. *Exp Maths* David Miller, Peter Sherran, 2003-11 An interactive whiteboard course matched to the teaching objectives for year 7 in the Framework for teaching mathematics. Developed in conjunction with Keele University and piloted in schools as part of a major research project, this CD-ROM and accompanying Teacher Support Pack enables you to make use of interactive whiteboard technology. **Didactical Phenomenology of Mathematical Structures** Hans Freudenthal, 2005-11-28 The launch of a new book series is always a challenging event, not only for the Editorial Board and the Publisher but also and more particularly for the first author. Both the Editorial Board and the Publisher are delighted that the first author in this series is well able to meet the challenge. Professor Freudenthal needs no introduction to anyone in the Mathematics Education field and it is particularly fitting that his book should be the first in this new series because it was in 1968 that he and Reidel produced the first issue of the journal *Educational Studies in Mathematics*. Breaking fresh ground is therefore nothing new to Professor Freudenthal and this book illustrates well his pleasure at such a task. To be strictly correct the ground which he has broken here is not new but as with Mathematics as an Educational Task and Weeding and Sowing it is rather the novelty of the manner in which he has carried out his analysis which provides us with so many fresh perspectives. It is our intention that this new book series should provide those who work in the emerging discipline of mathematics education with an essential resource and at a time of considerable concern about the whole mathematics curriculum this book represents just such a resource.
