Measuring Eternity:

Measuring Eternity Martin Gorst, 2002-11-12 The untold story of the religious figures philosophers astronomers geologists physicists and mathematicians who for more than four hundred years have pursued the answer to a fundamental question at the intersection of science and religion When did the universe begin The moment of the universe's conception is one of science's Holy Grails investigated by some of the most brilliant and inquisitive minds across the ages Few were more committed than Bishop James Ussher who lost his sight during the fifty years it took him to compose his Annals of all known history now famous only for one date 4004 b c Ussher's date for the creation of the world was spectacularly inaccurate but that didn't stop it from being so widely accepted that it was printed in early twentieth century Bibles As writer and documentary filmmaker Martin Gorst vividly illustrates in this captivating character driven narrative theology let Ussher down just as it had thwarted Theophilus of Antioch and many before him Geology was next to fail the test of time In the eighteenth century naturalist Comte de Buffon working out the rate at which the earth was supposed to have cooled came up with an age of 74 832 years even though he suspected this was far too low Biology then had a go in the hands of fossil hunter Johann Scheuchzer who alleged to have found a specimen of a man drowned at the time of Noah's flood Regrettably it was only the imprint of a large salamander And so science inched forward via Darwinism thermodynamics radioactivity and most recently the astronomers at the controls of the Hubble space telescope who put the beginning of time at 13.4 billion years ago give or take a billion Taking the reader into the laboratories and salons of scholars and scientists visionaries and eccentrics Measuring Eternity is an engagingly written account of an epic often quixotic quest of how individuals who dedicated their lives to solving an enduring mystery advanced our knowledge of the universe

The Freedom of the Will as a Basis of Human Responsibility and a Divine Government Daniel Denison Whedon, 1864 **Freedom of the Will** Daniel Whedon, 2009-01-01 Is the human will in bondage to sinful motives to the point that people cannot make truly free decisions Daniel D Whedon a prominent nineteenth century Wesleyan theologian takes aim at this central thesis of the famed theologian Jonathan Edwards In this new edition of his widely admired 1864 work Whedon offers a step by step examination of Edwards s positions and finds them lacking in Biblical and logical support Within his position against Edwards he argues that the difference between natural ability and moral ability is meaningless that Edwards s deterministic necessitarian argument makes God the author of sin and that people frequently act against their strongest motives He concludes that without a free will there can be no justice no satisfying the moral sense no moral Government of which the creature can be the rightful subject and no God the righteous administrator
