Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also

protecting the future of our forests **Monitoring manual for grassland, shrubland and savanna ecosystems** Jeffrey E. Herrick, 2005 **Salmonid Field Protocols Handbook** David H. Johnson, 2007 This is the first publication to collect standardize and recommend a scientifically rigorous set of field protocols for monitoring and assessing salmon and trout populations Includes five additional techniques that can be used with any of the 13 principle methods to supplement information gathered Over four dozen fisheries experts throughout the U S Pacific Northwest and beyond contributed their time to pick write and review the most reliable protocols for enumerating salmonids in the field Presented in an easy to use format each of the 18 peer reviewed protocols covers objectives sample design data handling personnel and operational requirements and field and office techniques including survey forms Standardized monitoring protocols will improve data reliability maximize opportunities for data sharing and data set comparability and ultimately improve the ability to assess status and trends The Handbook will also support consistency in data collection for salmonids at the international level

Best Management Practices and Guidance Manual : Desert Renewable Energy Projects ,2009 **Natural Areas Journal** ,2007 **Wisconsin's Forestry Best Management Practices for Invasive Species** ,2009 *Restoring the Pacific Northwest* Dean Apostol, Marcia Sinclair, 2006-11-05 The Pacific Northwest is a global ecological hotspot because of its relatively healthy native ecosystems a high degree of biodiversity and the number and scope of restoration initiatives that have been undertaken there Restoring the Pacific Northwest gathers and presents the best examples of state of the art restoration techniques and projects It is an encyclopedic overview that will be an invaluable reference not just for restorationists and students working in the Pacific Northwest but for practitioners across North America and around the world **Ex Situ Plant Conservation** Edward O. Guerrant, Kayri Havens-Young, Mike Maunder, 2004 Ex Situ Plant Conservation outlines the role value and limits of ex situ conservation as well as updating best management practices for the field **Identification and Protection of Reference Wetland Natural Communities in New Jersey** ,2001 **Proceedings of the ...
