**The Cambridge Handbook of Competition Law Sanctions** Tihamer Tóth,2022-06-23 A unique comparison of the theory and practice of corporate and individual sanctions applied in competition law across five continents    *The Office of Fair Trading* Great Britain. National Audit Office,2009 The Office of Fair Trading OFT has improved its operations following recommendations on maintaining competition in markets made by the National Audit Office and Committee of Public Accounts in 2005 and 2006 It now needs to concentrate its efforts on strengthening the skills and experience of its staff at key management grades and be clearer on how long it expects its investigations will take The OFT is now directing its work to areas that have the most impact though this refocus on higher priority cases has led to a perception that the OFT is less interested in smaller markets with a risk that its deterrent effect will be reduced in these markets The OFT has taken steps to address this perception launching investigations into more local markets such as in construction and bus transport The time taken to process high profile cases has been reduced by introducing better project management and more flexible ways of working including using bigger teams and temporary legal staff The OFT has also brought criminal charges in two cartel cases for the first time under the Enterprise Act one of which to date has resulted in criminal convictions The OFT recognises that some of its cases are still taking too long The OFT operates in a competitive labour market and still continues to face challenges in attracting and retaining talented staff The OFT has provided project management and leadership training to its staff but it needs to sustain and increase this work in order to continue to recruit and retain staff at key management grades    *Criminalising Cartels* Caron Beaton-Wells,Ariel Ezrachi,2011-02-10 This book is inspired by the international movement towards the criminalisation of cartel conduct over the last decade Led by US enforcers criminalisation has been supported by a growing number of regulators and governments It derives its support from the simple yet forceful proposition that criminal sanctions particularly jail time are the most effective deterrent to such activity However criminalisation is much more complex than that basic proposition suggests There is complexity both in terms of the various forces that are driving and shaping the movement economic political and social and in the effects on the various actors involved in it government enforcement agencies the business community judiciary legal profession and general public Featuring contributions from authors who have been at the forefront of the debate around the world this substantial 19 chapter volume captures the richness of the criminalisation phenomenon and considers its implications for building an effective criminal cartel regime particularly outside of the US It adopts a range of approaches including general theoretical perspectives from criminal theory economics political science regulation and criminology and case studies of the experience

with the design and enforcement of existing or contemplated criminal cartel regimes in various jurisdictions including in Australia Canada EU Germany Ireland and the UK The book also explores the international dimensions of criminalisation its specific practical consequences such as increased potential for extradition as well as its more general implications for trends of harmonisation or convergence in competition law and enforcement

Joanna Beata Banach-Gutierrez,Christopher Harding,2016-07-28 The EU now possesses a clear legal basis for taking action on criminal law matters and steering the policy and practice of Member States in relation to crime and criminal law However for what is now an important area of law there remains a striking absence or uncertainty regarding its theoretical basis its legitimacy and its conceptual vocabulary This book offers a review of the significance of EU criminal law and crime policy as a rapidly emerging phenomenon in European law and governance Bringing together an international set of contributors the book questions the nature role and objectives of such criminal law its relationship with other areas of EU policy and law and the established rules of criminal law and criminal justice at the Member State level Taking up such subjects as the application of criminal law across national boundaries and in the broader European context effective enforcement and the working out of a new European policy the book helps to structure an increasingly significant subject in law which is still finding its direction The book will be of great use and interest to researchers and students of EU law criminal justice and criminology
