Palgrave Environmental Reader:

The Palgrave Environmental Reader Richard Newman,Daniel Payne,2016-04-30 The Palgrave Environmental Reader explores America's evolving fascination with nature and environmental concerns From the New England Transcendentalists to the UN convention on climate change this book includes works by Thomas Jefferson Henry David Thoreau Theodore Roosevelt Rachel Carson E O Wilson and others Consisting of thirty five important pieces covering a variety of issues this reader distinguishes itself from other writing on the subject by presenting more extensive excerpts and by emphasizing themes such as environmental activism racism and law

Eco-Concepts Cenk Tan,ISMAIL Serdar Altaç,2024-04-15 Eco Concepts Critical Reflections in Emerging Ecocritical Theory and Ecological Thought offers an intellectual journey through

the ever evolving landscapes of environmental discourse This thought provoking volume brings together contributors from international scholarship to scrutinize and illuminate the contemporary trends reshaping our understanding of the natural environment From the intricate interplay of rising ecocritical theories like restoration and empirical ecocriticism to the nuanced shifts in the reimagining of ecological concepts this book unravels the complexities of our relationship with the natural sphere This scholarly collection serves as a compass guiding readers through the uncharted territories of environmental scholarship or revisiting existing study through fresh critical perspectives Eco Concepts strives to become an essential source of reference for academics students and individuals seeking an in depth exploration of the innovative notions influencing the trajectory of discussions on ecology

Environmental Thought Robin Attfield,2021-03-16 Environmental

thought has a rich and extensive history Philosopher Robin Attfield guides readers through the key developments and debates that have defined the field from ancient times to the present Attfield investigates ancient medieval and early modern environmental contributions Darwin and his successors the debate in America involving Thoreau Marsh Muir and Pinchot the foundation of the science of ecology in the Western world and twentieth century trailblazers like Aldo Leopold and Rachel Carson Central themes of key environmentalist works of the 1970s and 1980s are discussed along with the major debates in environmental philosophy including Lovelock's Gaia hypothesis Attfield then turns to the current environmental emergency encompassing the crises of climate change air pollution and biodiversity loss exploring contemporary intellectual responses to it Each chapter concludes with a list of recommended readings selected to invite readers to explore the book's topics in greater depth Environmental Thought A Short History will become a pivotal text in its field of interest to students and scholars of history philosophy ethics geography religion biology and environmental studies

The Child to Come Rebekah

Sheldon,2016-11-01 Generation Anthropocene Storms of My Grandchildren Our Children's Trust Why do these and other attempts to imagine the planet's uncertain future return us again and again to the image of the child In The Child to Come Rebekah Sheldon demonstrates the pervasive conjunction of the imperiled child and the threatened Earth and blisteringly critiques the logic of catastrophe that serves as its motive and its method Sheldon explores representations of this perilous

future and the new figurations of the child that have arisen in response to it Analyzing catastrophe discourse from the 1960s to the present books by Joanna Russ Margaret Atwood and Cormac McCarthy films and television series including Southland Tales Battlestar Galactica and Children of Men and popular environmentalism Sheldon finds the child standing in the place of the human species coordinating its safe passage into the future through the promise of one more generation Yet she contends the child figure emerges bound to the very forces of nonhuman vitality he was forged to contain Bringing together queer theory ecocriticism and science studies The Child to Come draws on and extends arguments in childhood studies about the interweaving of the child with the life sciences Sheldon reveals that neither life nor the child are what they used to be Under pressure from ecological change artificial reproductive technology genetic engineering and the neoliberalization of the economy the queerly human child signals something new the biopolitics of reproduction By promising the pliability of the body's vitality the pregnant woman and the sacred child have become the paradigmatic figures for twenty first century biopolitics

Leave It in the Ground John C. Berg, 2019-09-03 Employing scientific explanations and hard data this book shows why coal is such a problem how the pro coal forces got to be so powerful and how those forces might be defeated through political activism Coal provided the energy to build modern civilization This energy source raised standards of living multiplied the earth's population and enabled people in developed countries to enjoy leisure time Today we know that if we burn all the coal available climate change will continue to increase But the use of coal isn't purely an environmental issue political and economic forces are also at play This book examines the politics and environmental impact of coal production and distribution presenting a clear point of view that we must shift away from coal use backed by hard data and supplying specific prescriptions for opposing and regulating the coal industry John C Berg explains how ending the burning of coal and of oil and natural gas is a political problem rather than a technical one explodes the clean coal myth providing scientific documentation of how burning coal emits more greenhouse gases per unit of energy than any other fuel and describes how controlling coal use in the United States will also restore the possibility of a meaningful international climate agreement Additionally readers will understand the critical importance of activism from local to international in spurring government regulation to control the coal industry which can only be defeated politically

Histories of the Dustheap Stephanie Foote, Elizabeth Mazzolini, 2012 An examination of how garbage reveals the relationships between the global and the local the economic and the ecological and the historical and the contemporary Garbage considered both materially and culturally elicits mixed responses Our responsibility toward the objects we love and then discard is entangled with our responsibility toward the systems that make those objects Histories of the Dustheap uses garbage waste and refuse to investigate the relationships between various systems the local and the global the economic and the ecological the historical and the contemporary and shows how this most democratic reality produces identities social relations and policies The contributors first consider garbage in subjective terms examining toxic autobiography by residents of Love Canal the intersection of public

health and women's rights and enviroblogging. They explore the importance of place with studies of post Katrina soil contamination in New Orleans, e-waste disposal in Bloomington Indiana and garbage on Mount Everest. And finally they look at cultural contradictions as objects hover between waste and desirability examining Milwaukee's efforts to sell its sludge as fertilizer, the plastics industry's attempt to wrap plastic bottles and bags in the mantle of freedom of choice and the idea of obsolescence in the animated film *The Brave Little Toaster*. Histories of the Dustheap offers a range of perspectives on a variety of incarnations of garbage inviting the reader to consider garbage in a way that goes beyond the common buy green discourse that empowers individuals while limiting environmental activism to consumerist practices.

African Philosophy and Deep Ecology Kenneth Uyi Abudu, Kevin Gary Behrens, Elvis Imafidon, 2025-07-11. This book investigates African philosophical contributions to the concept of deep ecology which advocates for rethinking human and non-human relationships within our ecosystems by promoting the inherent and earned worth of all beings. With ecological crises impacting lives around the world this book interrogates deep ecology thinking from African philosophical perspectives highlighting the continent's important ontological, epistemological, ethical, aesthetic and broad philosophical contributions. The book investigates issues such as the eco phenomenology of human/non-human animal relations, Ubuntu and the environment, the superiorist fallacy, environmental belongingness, the impact of colonization and modernity on non-human trauma, the politics of ecological narrative about African places, the question of moral status, African socialist perspectives, the question of degrowth, selective subordination, biodiversity loss, land ethics, the ontology of waste and the concept of personhood in relation to global climate and ecological justice. Providing a significant intervention in our understanding of the ecological crises and our duties toward ecosystems and the non-human other in the twenty-first century, this book is an important read for researchers, advocates and other stakeholders working in the fields of environmental philosophy, climate change, indigenous studies and African Studies.

African Ethics Jonathan O. Chimakonam, Luis Cordeiro-Rodrigues, 2022-08-25. This is the first comprehensive exploration of African ethics covering everything from normative ethics and applied ethics to meta ethics and methodology as well as the history of its evolution. African Ethics provides an in-depth exploration of Ubuntu ethics which is defined as a set of values based on concepts such as reciprocity, mutual respect and working towards the common good. Ubuntu ethics also strongly emphasize the place of human dignity. The book engages with both theory and practice and how these ethical ideas impact upon the actual lived experience of Africans. It also includes important political considerations such as the impact of imperialism, colonialism and capitalism on African ethics as well as the negative impact of apartheid and the renaissance made possible by the Truth and Reconciliation Commission whose work was premised heavily on African ethical ideas. This book is not just a wide-ranging and incisive introduction but also a reformulation of key concepts and current debates in African ethics. Crucially, African Ethics is an inclusive text one that speaks from an African perspective and contributes to the decolonizing of contemporary
