three hundred species of parrots of which more than one hundred are recognised as rare endangered vulnerable or threatened with extinction Parrots are largely distributed in tropical areas of developing countries where economies are weak and uncertain and where there is great dependence on the exploitation of natural resources particularly hard wood evergreen forests which are preferred parrot habitats Unfortunately high levels of corruption are common to these regions with much illegal trade in animals and little or no law enforcement Collectors of parrots in the first world pay huge sums for rare parrots However research education and conservation actions are greatly reducing illegal trade in African parrots This book provides complete coverage of all aspects of the biology of extant African Malagasy and Mascarene parrots and reviews our knowledge of extinct and fossil parrots from the region Particular themes include the behavioural and ecological characteristics of parrots their species characteristics and conservation biology Current concepts in avian and conservation biology are also discussed Parrots of Africa Madagascar and the Mascarene Islands is aimed at ornithologists conservation biologists avian ecologists academics bird watchers and parrot fans alike It is well illustrated with high quality original photographs and includes distribution maps figures and tables Avian Cognition Debra S.
