## **Natural History Of Alcoholism:**

The Natural History of Alcoholism Revisited George E. Vaillant, 1995-05-25 When The Natural History of Alcoholism was first published in 1983 it was acclaimed in the press as the single most important contribution to the literature on alcoholism since the first edition of Alcoholic Anonymous's Big Book George Vaillant took on the crucial questions of whether alcoholism is a symptom or a disease whether it is progressive whether alcoholics differ from others before the onset of their alcoholism and whether alcoholics can safely drink Based on an evaluation of more than 600 individuals followed for over forty years Vaillant's monumental study offered new and authoritative answers to all of these questions In this updated version of his classic book Vaillant returns to the same subjects with the perspective gained from fifteen years of further follow up Alcoholics who had been studied to age 50 in the earlier book have now reached age 65 and beyond and Vaillant reassesses what we know about alcoholism in light of both their experiences and the many new studies of the disease by other researchers The result is a sharper focus on the nature and course of this devastating disorder as well as a sounder foundation for the assessment of various treatments

The Natural History of Alcoholism George E. Vaillant, 1985-06-01

Alcoholism is a disorder of enormous scope and destructive power that affects a third of all American families Yet despite extensive research there are few uncontested answers to fundamental questions about this devastating disorder Based on an evaluation of more than 600 individuals followed for over 40 years George Vaillant's monumental study offers new and authoritative answers to all of these questions

The Biology of Alcoholism Benjamin Kissin, 2012-12-06 Pathogenesis is defined in Blakiston's Medical Dictional as the course of development of disease including the sequence of processes or events from inception to the characteristic lesion or disease The central position of the word pathogenesis in the titles of Volumes 6 and 7 in itself connotes a bias on the part of the editors in favor of the disease concept of alcoholism inasmuch as the end product of the pathogenetic process is presumed to be a disease But the disease model as here conceptualized is vastly different from that of Jellinek or of Alcoholics Anonymous or of psychoanalysis In those theories alcoholism is seen as the inevitable consequence of some specific flaw in the heredity or the experience of the afflicted individual that inexorably leads to alcoholism In these present volumes the alcoholic syndrome is viewed rather as the outgrowth of the interaction of a variety of biological psychological and social influences which depending on the predominance of one or another may lead to different types of alcoholism This view which has been labeled the bio psycho social perspective encompasses a larger view of the dynamics of the development of alcoholism incorporating data from each of the phenomenologic levels involved An additional complication arises from the fact that the physiological and psychosocial stigmata of alcoholics which are probably most often the result of prolonged drinking frequently have come to be considered as causes of the disease

**Alcoholism And The Family** Saturo Saitoh, Peter Steinglass, Marc A. Schuckit, 2013-05-24 The science of the etiology and treatment of alcohol has made notable progress in recent years Since the early 1970s there have been growing inroads

made concerning the relevance of hereditary factors in alcoholism. This has led to the presentation of various innovative hypotheses in this field. In conjunction with this there has been much discussion and study of the alcoholic personality and its possible characteristics. These may be considered the longitudinal aspects linked to the transmission of alcoholism.

Alcoholism Nada J. Estes, 1986    The British Journal of Inebriety (alcoholism and Drug Addiction) ,1919 Contains papers read at the quarterly meetings of the society and extracts from the discussions following them with other communications dealing with alcohol and alcoholism    **The Truth about Addiction and Recovery** Stanton Peele, Archie Brodsky, Mary Arnold, 1991 A scientific view of the addiction process and how people both as individuals and as a community can overcome their addictions    *Society, Culture, and Drinking Patterns Reexamined* David Joshua Pittman, Helene Raskin White, 1991    The Alcoholic Family Peter Steinglass, 1987-12-20 In this groundbreaking work four distinguished researchers at the Center for Family Research at the George Washington Medical Center detail over ten years of research into alcoholism in the family context. This landmark work is essential reading for anyone who wants to understand or treat alcohol abuse. A welcome counterpoint to the simplistic explanations usually offered on the subject it provides us with the authors many years of careful sophisticated research in a clear empathic and clinically sensitive presentation. The developmental perspective has crucial implications for diagnosis and intervention. Nace, 1987 A lucid scholarly and highly clinical volume on the treatment of alcoholism with numerous case histories    **Alcohol Health and Research World** ,1991    *Research Advances in Alcohol & Drug Problems* ,1984    **Quarterly Journal of Studies on Alcohol** ,1990 Includes sections Activities of the Research Council on Problems of Alcohol and Current literature    *Journal of the American Medical Association* ,1902    **Is Alcoholism Hereditary?** Donald W. Goodwin, Donald W. Goodwin, M.D., 1988-03-12 A pioneering comprehensive guide to the genetics of alcoholism. Historically it has been widely accepted that alcoholism runs in families. Only during the last century did it become fashionable to blame alcoholism on faulty upbringing lack of willpower or heartbreaking disappointment. Now with the medical community again focusing on the influence of heredity on alcoholism noted psychiatrist and researcher Donald W Goodwin MD provides a comprehensive and reasoned overview of what their research has to offer. Beginning with basic information on the properties of alcohol and alcohol abuse Dr Goodwin brings to light the issues that alcoholics and their families must face. How and why do certain people become alcoholics. How occasional drinkers can become heavy drinkers and alcoholics. Which relatives of alcoholics are most at risk. Up to date evidence on how the disease is passed along from fathers to sons mothers to daughters grandparents to grandchildren how often it happens and what factors influence who inherits and who doesn't. If you or a loved one are predisposed what can you do. Dr Goodwin explains the treatments that are available and what the future may hold from drugs that stop an alcoholic's excessive drinking to education that could keep him from starting to drink at all.
