steps creating a Florida garden is achievable for beginners and experts alike The first step is assessing your property and choosing which plants to keep and which to remove Then design your landscape to soak up more stormwater through the use of rain barrels rain gardens or ponds The next steps involve planting trees understory plants and installing butterfly gardens There are additional instructions for building wild areas into your landscape to provide habitat for birds and pollinators creating a flexible outdoor room perfect for your family s needs today and into the future and using plants to cool the air provide screening for privacy buffer incoming winds and reduce noise By following these methods anyone can convert all or part of their yard into a more natural area without using pesticides or artificial fertilizers which will save money reduce pollution and help support wildlife Complete with detailed diagrams a timeline for growth and maintenance and lists of suggested plants for each step this guide will help readers set up an environmentally friendly habitat and give them the time and peace of mind to enjoy it     Landscaping with Native Plants of Southern California George Oxford Miller,2008 The best plants for the unique needs and resources of Southern California with photos maps charts and design samples as well as advice on maintenance and conservation
