**Between Enterprise and Ethics** John Hendry,2004-03-04 We live in a bimoral society in which people govern their lives by two contrasting sets of principles On the one hand there are the principles associated with traditional morality Although

these allow a modicum of self interest their emphasis is on our duties and obligations to others to treat people honestly and with respect to treat them fairly and without prejudice to help and care for them when needed and ultimately to put their needs above our own On the other hand there are the principles associated with the entrepreneurial self interest These also impose obligations but of a much more limited kind Their emphasis is competitive rather than cooperative to advance our own interests rather than to meet the needs of others Both sets of principles have always been present in society but in recent years traditional moral authorities have lost much of their force and the morality of self interest has acquired a much greater social legitimacy over a much wider field of behaviour than ever before The result of this is that in many situations it is no longer at all apparent which set of principles should take precedence In this book John Hendry traces the cultural and historical origins of the bimoral society and explores the challenges it poses for the world of business and management The developments that have led to the bimoral society have also led to new more flexible forms of organizing which have released people's entrepreneurial energies and significantly enhanced the creative capacities of business Working within these organizations however is fraught with moral tensions as obligations and self interest conflict and managers are pulled in all sorts of different directions Managing them successfully poses major new challenges of leadership and moral management as the technical problem solving that previously characterised managerial work is increasingly accomplished by technology and market mechanisms The key role of management becomes the political and moral one of determining purposes and priorities reconciling divergent interests and nurturing trust in interpersonal relationships Exploring these tensions and challenges Hendry identifies new issues for contemporary management and puts recognized issues into context He also explores the challenges posed for a post traditional society as it seeks to regulate and govern an increasingly powerful and global business sector
