Naturalistic Photography:

Peter Henry Emerson and American Naturalistic Photography Christian A. Peterson, 2008 Peter Henry Emerson 1856-1936 was a leading English photographer who spearheaded a style he termed naturalistic photography. He argued for photography as a fine art, encouraged his colleagues to use nature as their standard, and introduced the theory of differential focusing whereby the main subject was in focus and everything else fell into moderate softness. Many young Americans admired Emerson's work, forming a movement of naturalistic photography in this country that lasted from the 1890s to about 1930. Like Emerson, they emphasized the beauty of Mother Nature and humankind's harmony with her, photographing the land in all its seasons. Among the photographers whose work is included are Edward Curtis, Rudolf Eickemeyer, Alfred Stieglitz, and Doris Ulman. **Naturalistic Photography for Students of the Art (1889)** Peter H.
