Environmental Law and Policy in Wales Patrick Bishop,Mark Stallworthy,2013-02-15 This book examines welsh perspectives on the search for sustainable law and policy solutions to modern environmental threats The Law of Nature Conservation Christopher Rodgers,2013-03-21 Providing a detailed account of the law of nature conservation this book reviews and discusses the way in which the law promotes the conservation of species of animal bird and plant and how it protects natural habitats for protected species Using an interdisciplinary approach the book sets nature conservation in its economic and scientific context It explains how the law reconciles the public interest in promoting biodiversity and the

conservation of species and habitats on the one hand and the private property rights of landowners and other resource appropriators on the other. The book offers an illuminating new interpretation of this area of environmental regulation using a resource allocation model of property rights to explain how legal and economic instruments for promoting nature conservation work in practice. The analysis covers all recent legislation and case law including the Marine and Coastal Access Act 2009, the Conservation of Habitats and Species Regulations 2010 and the 2012 National Planning Policy Framework. The book will serve as a critical guide to UK nature conservation law for those working in the system and a valuable reference point on the UK's approach to the area for environmental lawyers and policy makers overseas. **The Oxford Handbook of**

*Planning and Environmental Protection* Chris E. Miller, 2001-09. This collection of essays examines the roles which land use planning can play in the protection of the environment. The subjects covered range from traditional concerns like pollution, nuisance and contaminated land to biodiversity and the pursuit of sustainable development which forms the defining element of current environmental policy across the European Community and in most other developed economies. Environmental assessment is discussed along with the succession of public law actions. The contributors represent a variety of academic disciplines: law, geography, planning, environmental management offering complementary insights into the planner's role in allocating land uses so as to minimise waste generation and energy consumption as well as maximising local amenity. *Urban Environments and Wildlife Law* Paul A.
