**The Fate of Nature** Charles Wohlforth, 2010-06-02 What capacity for good lies in the hidden depths of people Starting with this question award winning author Charles Wohlforth sets forth on a wide ranging exploration of our relationship with the world In *The Fate of Nature* he draws on science spirituality history economics and personal stories to reveal answers about the future of that relationship There is no better place to witness the highs and lows of our treatment of the natural world than the vast wilds rocky coasts and shifting settlements of Alaska Since the first encounter between Captain Cook's crew and the Alaskan Natives in 1778 there have been countless struggles between people who have had different plans for the region Some have hoped to preserve Alaska as they found it while others aimed to create something new in its place Incidents such as the Exxon Valdez oil spill may seem like cause for despair In the face of such profound tragedies Charles Wohlforth has found heartening developments in the science of human altruism This new understanding of what causes humans to cooperate and act conscientiously may be the first step toward taking the actions necessary to preserve an environment that has already been altered drastically in our lifetime A clear eyed original work of research reportage and philosophical reflections *The Fate of Nature* gives us a chance to change the way we think about our place in society and the world at large      **The Complete Nature Writings of John Burroughs: Ways of nature. Far and near** John Burroughs, 1905      *Nature*, 1896      [The Human Relationship with Nature](#) Peter H. Kahn, 1999 Winner of Outstanding Book Award 2000 Moral Development and Education American Educational Research Association Winner of the 2000 Book Award

from the Moral Development Education Group of the American Educational Research Association Urgent environmental problems call for vigorous research and theory on how humans develop a relationship with nature In a series of original research projects Peter Kahn answers this call For the past eight years Kahn has studied children young adults and parents in diverse geographical locations ranging from an economically impoverished black community in Houston to a remote village in the Brazilian Amazon In these studies Kahn seeks answers to the following questions How do people value nature and how do they reason morally about environmental degradation Do children have a deep connection to the natural world that gets severed by modern society Or do such connections emerge if at all later in life with increased cognitive and moral maturity How does culture affect environmental commitments and sensibilities Are there universal features in the human relationship with nature Kahn s empirical and theoretical findings draw on current work in psychology biology environmental behavior education policy and moral development This scholarly yet accessible book will be of value to practitioners in the social science and environmental fields as well as to informed generalists interested in environmental issues and children

Peter H. Raven,2000-03-07 From earliest times human beings have noticed patterns in nature night and day tides and lunar cycles the changing seasons plant succession and animal migration While recognizing patterns conferred great survival advantage we are now in danger from our own success in multiplying our numbers and altering those patterns for our own purposes It is imperative that we engage again with the patterns of nature but this time with awareness of our impact as a species How will burgeoning human populations affect the health of ecosystems Is loss of species simply a regrettable byproduct of human expansion Or is the planet passing into a new epoch in just a few human generations Nature and Human Society presents a wide ranging exploration of these and other fundamental questions about our relationship with the environment This book features findings insights and informed speculations from key figures in the field E O Wilson Thomas Lovejoy Peter H Raven Gretchen Daily David Suzuki Norman Myers Paul Erlich Michael Bean and many others This volume

explores the accelerated extinction of species and what we stand to lose medicines energy sources crop pollination and pest control the ability of water and soil to renew itself through biological processes aesthetic and recreational benefits and how these losses may be felt locally and acutely What are the specific threats to biodiversity The book explores human population growth the homogenization of biota as a result in tourism and trade and other factors including the social influences of law religious belief and public education Do we have the tools to protect biodiversity The book looks at molecular genetics satellite data tools borrowed from medicine and other scientific techniques to firm up our grasp of important processes in biology and earth science including the new science of conservation biology Nature and Human Society helps us renew our understanding and appreciation for natural patterns with surprising details about microorganisms nematodes and other overlooked forms of life their numbers pervasiveness and importance to the health of the soil water and air and to a host of human endeavors This book will be of value to anyone who believes that the world s gross natural product is as important as the world s gross national product      *Paleogene Tectonic Evolution of the Gulf of Alaska Region* Alan Joseph Bol, 1990
