Nature in the Round Nigel Calder,1973 Se pretende la elaboracion de un cuadro teorico y de una terminologia que facilita la consideracion cientifica del medio ambiente mediante el analisis de las posibles aportaciones de las otras ciencias asi como de los procedimientos de accion del hombre sobre la naturaleza *The Nature of the Environment* Andrew Goudie,1987

Interpreting Nature I. G. Simmons,2013-01-11 Human society has constructed many varied notions of the environment Scientific information about the environment is often seen as the only worthwhile knowledge This ignores the complexities created by interaction between people and the environment Idealist thinking argues that everything we know is based on a construct of our minds and that all is possible Can both be correct and true Interpreting Nature explores the position of humanity in the environment from the principle that the models we construct are imperfect and can only be provisional Having examined the way in which the natural sciences have interrogated nature the types of data produced and what they mean to us this looks at the environment within philosophy and ethics the social sciences and the arts and analyses their role in the formation of environmental cognition

Nature and the Environment in Twentieth-Century American Life Brian Black,2006-05-30 Americans during the twentieth century became more disconnected from the environment and nature than ever before More Americans lived in cities rather than on farms they became ever more reliant on technology to interact with the world around them and with each other Perhaps paradoxically the twentieth century also became the period in which environmental issues played an ever increasing role in politics and public policy Why is this so Perhaps because despite what many people believe nature and the environment remains central to everyone's daily life Pollution environmental degradation urban sprawl loss of wildlife and biodiversity all of these issues directly impact how everyone even city dwellers live their lives Nature and the Environment in Twentieth

Century America addresses a wide variety of the environmental issues that impacted the lives of people of all classes races and regions The expansion of the National Park system and the increased desire for leisure time spent in the great outdoors The devastation of the Dust Bowl and its impetus toward conservation and a greater understanding of ecology Grassroots activism and environmental politics from Rachel Carson to Love Canal The impact of globalization and its environmental consequences on the daily lives of Americans Part of the Daily Life through History series this title joins Nature and the Environment in Nineteenth Century American a new branch of the series titles specifically looking at how science innovations impacted daily life

On Nature and the Environment Jiddu Krishnamurti, 1991 The Human Impact on the Natural Environment Andrew Goudie, 2000 The book also discusses the development of ideas on global change

BOOK JACKET Humans Versus Nature Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R. Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

Green Perspectives Walter Levy, Christopher Hallowell, 1994 This unique anthology of readings engages students with current ecological issues and the history of the environmental movement Chronologically organized from 1850 through 1993 it exposes students to the Green Perspectives in historical political and social contexts The diverse collection of readings includes essays short stories poems and excerpts from novels and represents many different points of view and disciplines

Nature Stories James Shanahan, Katherine McComas, 1999 This volume seeks to examine the role of the mass media especially television in the construction of the environment It studies the effects from television's messages about the environment and how journalism deals with environmental issues

Nature, Environment and Society Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental

movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories Nature Environment and Society provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems

Nature, Environment, and Activism in Nigerian Literature Sule E. Egya, 2020-03-24 Nature Environment and Activism in Nigerian Literature is a critical study of environmental writing covering a range of genres and generations of writers in Nigeria With a sustained concentration on the Nigerian experience in postcolonial ecocriticism the book pays attention to textual strategies as well as distinctive historicity at the heart of the ecological force in contemporary writing Focusing on nature the environment and activism the author decentres African ecocriticism affirming the eco social vision that differentiates environmental writing in Nigeria from those of other nations on the continent The book demonstrates how Nigerian writers beyond connecting themselves to the natures of their communities respond to ecological problems through indigenous literary instrumentalism Anchored on the analytical concepts of nature environment and activism the study is definitive in foregrounding the contribution of Nigerian writing to studies in ecocriticism at continental and global levels This book will be of interest to scholars of African and Postcolonial literature ecocriticism and the environmental humanities

Nature Performed Bronislaw Szerszynski, Wallace Heim, Claire Waterton, 2004-04-02 This book brings together contributions from scholars across the humanities A wide ranging exploration of the interface between performance and nature Examines the use and usefulness of ideas of performance for understanding human nature relationships Draws on different disciplines and intellectual traditions and on different conceptions of performance and nature Contributions are rooted in real world contexts and problems explored through detailed ethnographic work Explores domains as diverse as allotments and bioinvasion fox hunting and green politics Makes a distinctive contribution to the cultural turn in environmental research

The Nature of the Environment Andrew Goudie, 2001-02-01 *Reclaiming Nature* James K. Boyce, Sunita Narain, Elizabeth A. Stanton, 2007 In *Reclaiming Nature* leading environmental thinkers from across the globe explore the relationship between human activities and the natural This is a bold and comprehensive text of major interest to both students of the environment and professionals involved in policy making

Down to Earth Theodore Steinberg, 2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative Now in a new edition Down to Earth reenvision the story of America from

the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good he reminds readers that many critical episodes in U S history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities *Environmental Science* Charles E. Kupchella, Margaret C. Hyland, 1986 Utilizing a human centered approach this text bases its ideas for environmental science on ecological principles and extends coverage to the interactions between humankind and the environment It covers the basic principles of ecology Homo Sapiens in the scheme of natural things the impact of human activities on health and the environment and problems and solutions For professionals in environmental science **The Nature of Deity** John Evan Turner, 1927 Nature in Cities Ian C. Laurie, 1979
