is a social problem that has never been discussed Both in terms of the poverty rate the impact it causes the factors that cause
it to the alternatives to overcome it The phenomenon of poverty is related to various dimensions of life so that the problem of
poverty becomes very complex The problem of poverty requires multisectoral handling it cannot be resolved only from one
sector but requires a collaborative approach from various sectors in government as well as with the private sector and the
community Because poverty does not only concern the economic education health infrastructure but also social cultural and
even political issues So that a multidimensional policy is needed with a coping strategy that involves many parties in an
integrated manner In fact the government has made various efforts to reduce poverty both at the national level and for
districts and cities Some of these efforts include opening job opportunities providing direct assistance in the form of
materials to the poor as well as community empowerment as a preventive measure taken in order to develop community
competencies and skills Therefore poverty reduction remains a focus in development and is a shared responsibility not only
the central government and local governments but contributions and collaboration from various parties are needed In the
direction of a new life order poverty reduction becomes a crucial topic to be addressed The National Seminar on Community
Empowerment and Poverty Reduction Strategies is a momentum to bring together various critical views and thoughts from
various fields of science related to strategies that can be carried out in reducing poverty It is hoped that this national
seminar will produce an appropriate strategy in accelerating poverty reduction in Indonesia in general and in Bali in
