## Naval Maritime History:

**Maritime History and Identity** Duncan Redford, 2013 The sea and its relation to human life has always been a subject of fascination for historians For the first time this book looks at the field of Maritime History through the prism of identity looking at how the sea has influenced the formation of identity at a national local and individual level from the early modern age to the present It looks at a variety of people who interacted with the sea in different ways from merchant sailors to naval officers and on land from dockworkers to the civilians who participated in the sea based festivals in the Mediterranean port city of Messina A cultural strand runs through the volume with chapters focussing on the cultural construction of the naval hero in literature poetry music and art and an appraisal of the Japanese author and journalist It Masanori whose works had such a profound influence on Japan s post World War II national identity A key focus is the ways in which the Royal Navy influenced British identity at a national and regional level but other countries with a strong naval tradition such as Japan Italy and Germany are also analysed By bringing together a variety of themes related to identity this book provides the first attempt to thoroughly analyse the ways in which maritime historians have engaged with the question of identity in recent years In doing so it provides an important and unique addition to the historiography which will be essential reading for all scholars of maritime and naval history and those concerned with the question of identity Bloomsbury Publishing **Naval & Maritime History** Robert Greenhalgh Albion, 1972 First published 1951 under title Maritime and naval history Naval & Maritime History Robert Greenhalgh Albion, 1968 **Naval Science 2** Richard R. of these pieces have been published previously but have appeared in other languages and in other countries where they may not have come to the attention of an American naval reading audience This collection is divided into parts that deal with four major themes the broad field of maritime history general naval history with specific focus on the classical age of sail from the mid seventeenth century to the end of the Napoleonic Wars in 1815 the wide scope of American naval history from 1775 to the end of the twentieth century and finally the realm of naval theory and its relationship to naval historical studies They are reprinted with only minor alterations as the originally appeared

The Sea and Civilization Lincoln Paine, 2013-10-29 A monumental retelling of world history through the lens of maritime enterprise revealing in breathtaking depth how people first came into contact with one another by ocean and river lake and stream and how goods languages religions and entire cultures spread across and along the world's waterways bringing together civilizations and defining what makes us most human Lincoln Paine takes us back to the origins of long distance migration by sea with our ancestors first forays from Africa and Eurasia to Australia and the Americas He demonstrates the critical role of maritime trade to the civilizations of ancient Egypt Mesopotamia and the Indus Valley He reacquaints us with the great seafaring cultures of antiquity like those of the Phoenicians and Greeks as well as those of India and Southeast and East Asia who parlayed their navigational skills shipbuilding techniques and commercial acumen to establish thriving overseas colonies and trade routes in the centuries leading up to the age of European expansion And finally his narrative traces how commercial shipping and naval warfare brought about the enormous demographic cultural and political changes that have globalized the world throughout the post Cold War era This tremendously readable intellectual adventure shows us the world in a new light in which the sea reigns supreme We find out how a once enslaved East African king brought Islam to his people what the American sail around territories were and what the Song Dynasty did with twenty wheel human powered paddleboats with twenty paddle wheels and up to three hundred crew Above all Paine makes clear how the rise and fall of civilizations can be linked to the sea An accomplishment of both great sweep and illuminating detail *The Sea and Civilization* is a stunning work of history

Runyan, 1985 This first general survey of European naval and maritime history for the period from A D 300 to 1500 focuses on Western Europe including the Baltic North Sea and Atlantic traditions and on the Mediterranean particularly Byzantine and Moslem naval history The authors survey a number of interconnected areas the use of seapower in international and intercultural relations commerce and trade routes naval technology and design military tactics the physical features of seafaring and the geography of the sea They make accessible to the general reader very technical scholarship and provide numerous maps and illustrations that explain the changes in ship design and construction The overall result is a powerful historical synthesis which gives students teachers and general readers a feel for the seafaring life and the place of the sea within medieval civilization
