Navies In The Nuclear Age:

Navies in the Nuclear Age Robert Gardiner, Norman Friedman, 1993 *Seapower in the Nuclear Age* Joel J. Sokolsky, 2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US's Cold War maritime strategy showing how NATO's maritime forces were organised in the period. It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance's nuclear and conventional deterrent forces. It looks at the structure of the main naval commands, the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO's naval posture in the 1970s. Drawing upon many declassified documents, this account fills an important gap in postwar literature on American seapower and its relation to European security. It also addresses important aspects of NATO strategy and organisation.

Navies in the Nuclear Age Norman Friedman, 2001-08 By 1945 the threat to warships from above and below the water's surface had come to dominate naval strategic and tactical planning. Although many of the traditional ship designations like cruisers, destroyers and frigates continue to be used, they no longer imply a specific role. This volume therefore emphasizes such broader themes as anti-submarine warfare or electronics which involve many ship types.

Maritime Strategy and the Nuclear Age Geoffrey Till, 1984-06-14 *The Navy of the Nuclear Age, 1947-2007* Paul Silverstone, 2011-04-06 The Navy of the Nuclear Age 1947-2007, the fifth volume in the monumental US Navy Warship series, presents an all-inclusive compendium of the ships that served in the US Navy from the Cold War up through the present day. Featuring radical new developments in warships such as nuclear-powered submarines and carriers equipped with ballistic missiles, the post-World War II period was one of unprecedented technological growth for the US Navy. The Navy of the Nuclear Age contains specifications and illustrations for all the ships and submarines that have helped the US to achieve its present-day status as the country with the world's largest and most powerful navy. The Navy of the Nuclear Age, 1947-2007, 2008 The Relevance of Superpower Navies in the Nuclear Age Robert Carney Powers, 1977 **A Soviet Navy for the Nuclear Age** Steve F. Kime, 1980 In this paper, a continuing topic of concern to US security policymakers is addressed: the growing qualitative and quantitative improvements in the Soviet military establishment. Perhaps one of the more interesting aspects of this trend has been the marked improvement in the strengths and capabilities of the Soviet Navy, which, as the author notes, has undergone a revolution. Commander Steve Kime has published several earlier pieces about Soviet maritime affairs. In this issue paper, he provides a useful perspective on current Soviet naval initiatives by tracing the historical development of the Russian Navy to its current status as a formidable nuclear force with global reach. In fact, as the study suggests, it is a force which challenges the national will of the United States to remain the world's leading seapower.

Strategy in the Second Nuclear Age Toshi Yoshihara, James R. Holmes, 2012-12-01 A second nuclear age has begun in the post-Cold War world. Created by the expansion

of nuclear arsenals and new proliferation in Asia it has changed the familiar nuclear geometry of the Cold War Increasing potency of nuclear arsenals in China India and Pakistan the nuclear breakout in North Korea and the potential for more states to cross the nuclear weapons threshold from Iran to Japan suggest that the second nuclear age of many competing nuclear powers has the potential to be even less stable than the first Strategy in the Second Nuclear Age assembles a group of distinguished scholars to grapple with the matter of how the United States its allies and its friends must size up the strategies doctrines and force structures currently taking shape if they are to design responses that reinforce deterrence amid vastly more complex strategic circumstances By focusing sharply on strategy that is on how states use doomsday weaponry for political gain the book distinguishes itself from familiar net assessments emphasizing quantifiable factors like hardware technical characteristics and manpower While the emphasis varies from chapter to chapter contributors pay special heed to the logistical technological and social dimensions of strategy alongside the specifics of force structure and operations They never lose sight of the human factor the pivotal factor in diplomacy strategy and war

Four-ocean Navy in the Nuclear Age Thomas W. McKnew, 1965 A Soviet Navy for the Nuclear Age NATIONAL DEFENSE UNIV WASHINGTON DC RESEARCH DIRECTORATE., Kime Steve F., S.F. Kime, 1980 In this paper a continuing topic of concern to US security policymakers is addressed the growing qualitative and quantitative improvements in the Soviet military establishment Perhaps one of the more interesting aspects of this trend has been the marked improvement in the strengths and capabilities of the Soviet Navy which as the author notes has undergone a revolution Commander Steve Kime has published several earlier pieces about Soviet maritime affairs In this issue paper he provides a useful perspective on current Soviet naval initiatives by tracing the historical development of the Russian Navy to its current status as a formidable nuclear force with global reach In fact as the study suggests it is a force which challenges the national will of the United States to remain the world's leading seapower State of European security : navies in the nuclear age Union de l'Europe occidentale. Commission des questions de défense et des armements, 1963

Seapower in the Nuclear Age Anthony Eugene Sokol, 1961 *Parameters*, 1980 *The Royal Navy Since 1945* Arthur Cecil Hampshire, 1975

Air University Periodical Index, 1958 **Air University Library Index to Military Periodicals**, 1958 A Soviet Navy for the Nuclear Age Kime Steve F., 1980 Though the Imperial Russian Navy had some glorious moments and the modern Soviet Navy has become ever more visible naval power has never played a primary role in either the Russian or the Soviet scheme of nationhood The Soviet Navy is only part of a vast highly integrated array of continental and intercontinental military power and Soviet military power is viewed by Soviet leaders as merely a single element of a broad correlation of political economic and military forces in the world There is no question however that military power is critical in this Soviet view of the world and that the Soviet Navy has managed to flourish

Limited Warfare in the Nuclear Age Robert A. Doughty, Robert Doughty, Ira Gruber, Roy K. Flint, Mark Grimsley, Donald D. Howard, John A. Lynn, Williamson Murray, 1996 Cold War

competition and tensions caused numerous armed conflicts after World War II but the threat of atomic and nuclear weapons shaped the conduct of those wars and ensured they remained limited Because the existence of nuclear weapons created the possibility of a small crisis escalating into a vast nuclear exchange the superpowers sought to deter their use Preface
