Music Streaming Around the World David Hesmondhalgh, 2025 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Music streaming platforms such as Spotify, Apple Music, YouTube, and those offered by Chinese web giant Tencent are now central to everyday musical activity across much of the world with enormous ramifications for musical culture in modern societies. Bringing together case studies from twelve countries, *Music Streaming around the World* provides the first international account of how streaming is shaping music culture today by considering the implications of streaming platforms for the production, distribution, and consumption of recorded music around the globe.

Media Imperialism Oliver Boyd-Barrett, Tanner Mirrlees, 2019-08-19 *Media Imperialism: Continuity and Change* advances applied theoretical research on 21st century media imperialism. The volume includes established and emerging researchers in international communications who examine the geopolitical, economic, technological, and cultural dimensions of 21st century media imperialism. The volume highlights and challenges how news, entertainment, and social media uphold unequal power relations in the world. Written in an accessible style, this volume marries conceptual theoretical sophistication and concrete illustration with rich case studies and global examples. Chapters cover the complete media spectrum from social media to Hollywood to news and national propaganda in national and transnational analyses. Readers will find discussions that range from soft power and China to the USA's empire of the internet to the rise of Chindia in a post-American media world. The volume is essential reading for upper level undergraduate, postgraduate, and research communities across a wide range of disciplines in the social science and the humanities.

Complex Networks XI Hugo Barbosa, Jesus Gomez-Gardenes, Bruno Gonçalves, Giuseppe Mangioni, Ronaldo Menezes, Marcos Oliveira, 2020-02-21 This book aims to bring together researchers and practitioners from diverse disciplines from sociology, biology, physics, and computer science who share a passion to better understand the interdependencies within and across systems. This volume contains contributions presented at the 11th International Conference on Complex Networks, CompleNet, in Exeter, United Kingdom, 31 March–3 April 2020. CompleNet is a venue for discussing ideas and findings about all types of networks from biological to technological to informational and social. It is this interdisciplinary nature of complex networks that CompleNet aims to explore and celebrate.

SPOTIFY: HOW THE COMPANY USES DATA TO INFLUENCE MUSIC TASTES AROUND THE WORLD MAX EDITORIAL,2025-04-15 Introduction to the World of Data and Spotify The digital revolution has transformed the way we consume music and Spotify is one of the biggest drivers of this transformation The streaming app launched in 2008 has grown exponentially not just as a music service but as a platform that analyzes collects and uses data on its users behavior to personalize the music experience for billions of people around the world The key to Spotify s success is not only its vast library of music but its ability to use data to influence shape and even predict users musical tastes The Era of Music Streaming Before Spotify the music industry was dominated by CD purchases individual downloads and of course radio While radio has been a dominant platform for introducing new music for decades it has its limitations Spotify with its data driven model has revolutionized this dynamic by offering nearly unlimited access to music while also personalizing track suggestions based on users listening behavior The Power of Data Spotify s biggest advantage over other music platforms is its ability to capture data Every time a user listens to a song skips a track or saves a song to a playlist Spotify collects this information and uses it to improve its music recommendations Spotify s recommendation algorithm is powered by a wealth of data about users preferences creating a personalized experience for each user How Data Shapes Music Preferences Data collection goes beyond just choosing songs Spotify monitors listening

time playlist engagement repeat tracks and even the times when a user is most likely to listen to a certain style of music. This data is then processed to create a detailed profile of each user helping the platform predict which songs are most likely to appeal to them. Practical example: Imagine that you are a fan of pop music and frequently listen to the most popular tracks on the charts. Spotify, by noticing this pattern, can recommend similar songs that are starting to gain popularity or even songs by emerging artists in the same style, influencing your musical tastes before you have even heard of them.

You Have Not Yet Heard Your Favourite Song Glenn McDonald,2024-06-20 If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here Joseph Menn Washington Post writer For the first time in history almost every song ever recorded is available instantly Everywhere This book charts what music's dazzling digital revolution really means for fans and artists As a former data guru at the world's biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of Russell Ter in Norway to Christmas in the Philippines Statistically you have not yet heard your lifetime's favourite song This book will take you on a voyage of discovery through music's fast flowing new waters 10 bonus playlists of wonder included About the Author Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify's Data Alchemist His website Every Noise at Once everynoise.com is an unprecedented computational map of the world's music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of All the Rave The Rise and Fall of Shawn Fanning's Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of Pivot and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by

someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Nettwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Popbie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business like any business long before streaming happened Back when charts were based on people reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardly Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy So you might have thought that fraud wouldn't be a big issue in streaming Buy the book and carry on reading
