Natural Radiation Environment:

The Natural Radiation Environment Jacob Kastner, 1968 **The Natural Radiation Environment** John Allan Stewart Adams, Wayne M. Lowder, 1964 The interplay between man and each environmental factor and that between the various factors themselves are fascination in their great intricacy and delicate balance **Natural Radiation Environment III**, 1980 The Natural Radiation Environment VII J.P. McLaughlin, E.S. Simopoulos, F. Steinhäusler, 2005-03-30 The Natural Radiation Environment Symposium NRE VII the Seventh in the NRE series which commenced forty years ago in 1963 at Rice University Texas was held in Rhodes Greece in May 2002 During the intervening four decades the research work presented at these NRE Symposia has contributed to a deeper understanding of natural radiation and in particular of its contribution to human radiation exposures It is clear from the quality and diversity of the 143 papers in this volume of Radioactivity in the Environment series that the study of the natural radiation environment is an active and continually expanding field of research The papers in this volume fall into a number of main and topical research areas namely the measurement and behaviour of natural radionuclides in the environment cosmic radiation measurement and dosimetry the external penetrating radiation field at ground level TENR Technologically Enhanced Natural Radiation and NORM Naturally Occurring Radioactive Materials studies assessment of the health effects of radon regulatory aspects of natural radiation exposures In these papers the results of many new surveys of natural radionuclide levels in the environment and of improved methods of detection are described While some of the natural radiation sources investigated are unmodified by human activity many accounts are given here of exposures to natural sources which have been enhanced by technology Such TENR and NORM exposures are shown to range from activities such as mining oil and gas exploitation the use of industrial by products as building materials to space travel to name but a few In several cases quite high doses to some individuals are shown to occur Accounts are given here of methods to prevent and reduce exposures to such sources *Natural Radiation Exposure in the United States* Donald T. Oakley, 1972 The Natural Radiation Environment Jacob Kastner, 1968 **The natural radiation environment**, 1963 **Natural Radiation Environment** K. G. Vohra, 1982 **Natural Radiation Environment Iii - Proceedings of a Symposium Held at Houston, Texas, April 23-28, 1978** United States. Department of Energy. Technical Information Center, T. F. GESELL, W. M. LOWDER, UNIV. OF TEXAS. SCHOOL OF PUBLIC HEALTH., 1978 The Natural Radiation Environment, 1964 **Natural Background Radiation in the United States** National Council on Radiation Protection and Measurements, 1975 The National Council on Radiation Protection and Measurements NCRP successor to the National Committee on Radiation Protection and Measurements has embarked on a program to examine and evaluate the many private studies and government programs related to sources of ionizing radiation that may contribute to the overall exposure of the population An assessment of the radiation doses will be made in several broad categories such as exposure from consumer products occupational exposure etc To the extent possible the results will be expressed in

meaningful quantities and units so as to facilitate comparisons of sources and exposures This report the first in a series of reports envisioned under this program is concerned with the assessment of the radiation dose to the population from natural background radiation Included in this report are the absorbed doses to the population due to radiation from cosmic sources radionuclides in the earth internally deposited radionuclides inhaled radioactivity and fallout from nuclear weapons tests From Preface page iii **The Natural Radiation Environment II.** John Allan Stewart Adams, Wayne M. Lowder, Thomas F. Gesell, 1972 **TENR - Technologically Enhanced Natural Radiation** Anselmo Salles Paschoa, F. Steinhausler, 2009-12-31 This book on TENR discusses the basic Physics and Chemistry principles of natural radiation The current knowledge of the biological effects of natural radiation is summarized A wide variety of topics from cosmic radiation to atmospheric terrestrial and aquatic radiation is addressed including radon thoron and depleted uranium Issues like terrorism and geochronology using natural radiation are also examined Comprehensive global TENR data assembly Critical assessment of the significant radiological impact of TENR on man and the environment as compared to radiological impact from man made sources in nuclear technology and nuclear medicine Illustration of the importance of TENR for the future conceptual development of radiation protection *Natural Radiation Environment III* Thomas F. Gesell, Wayne M. Lowder, James E. McLaughlin, 1980-01-01 Natural Radiation Environment III Thomas F. Gesell, Wayne M.
