### **The Leopard's Spots** Gerrit

Dimmendaal,2015-01-27 In The Leopard's Spots Gerrit J Dimmendaal discusses the interaction between language cognition and culture in an African context with special focus on the cultural construction of meaning through language Such constructions are constrained by our cognitive system but leave lots of space for culture specific interpretations and thereby for tremendous typological diversity between languages This variation reflects the adaptive nature of human language in the same way that the spots of the leopard reflect selective advantages for its natural habitat But whereas science has essentially one explanation for the rosettes of the leopard the non scientific mind may attach meaning to his or her cultural environment by way of language through a plethora of strategies

The Annual Report & Accounts British Broadcasting Corporation, 1987 *The Man-leopard Murders*

David Pratten, 2007 Focuses on the deaths of about 200 people in southern Nigeria in the mid 1940s. At the time, the deaths were explained as predation by shape-shifting leopard men and native witchcraft. Leads readers on a tortuous road to discoveries about local resistance to colonial and missionary encroachment. Pratten reveals how secret societies worked behind the scenes to impose authority at a time when traditional values were losing ground. Could the leopard murders have been a convenient way to take care of the spread of information that placed too much knowledge about native society in the hands of European authorities?

**Jacket** *Nature* Sir Norman Lockyer, 1921 **Wild And Wilful** Neha Sinha, 2021-02-10 A profound truth of the wild and the world at large is that we are a part of it, not owners of it. Is there any animal we love and hate as much as the Royal Bengal Tiger? Tigers are feared and poached, but they also endure, becoming pin-ups for candlelight marches. Indian elephants are trapped by railway lines and fences, but are reclaiming their bodies and colonizing new areas in central India. And in our dirty cities, the sparkling Plain Tiger Butterfly flourishes as one of our last links to wildlife. Wild animals exist beyond our control. They are harmless only occasionally, dangerous. They live with us or in spite of us. Those who know them understand that wild animals require acceptance for what they are, not enslavement for what we want them to be. In this book, we meet fifteen iconic Indian species in need of conservation and heart. The author explores what these creatures need and how they exert agency and decision-making. With an equal emphasis on human and animal science and skilled prose, *Wild and Wilful* reveals the magic of the wild in our daily lives. It will take you from fear to wonder.
