**David Thomas**

## **Naturalistic Hermeneutics:**

**Naturalistic Hermeneutics** C. Mantzavinos, 2005-03-14 Naturalistic Hermeneutics first published in 2005 proposes the position of the unity of the scientific method and defends it against the claim to autonomy of the human sciences Mantzavinos shows how materials that are meaningful more specifically human actions and texts can be adequately dealt with by the hypothetico deductive method the standard method used in the natural sciences The hermeneutic method is not an alternative method aimed at the understanding and the interpretation of human actions and texts but it is the same as the hypothetico deductive method applied to meaningful materials The central thesis advocated by Mantzavinos is thus that there is no fundamental methodological difference between natural sciences social sciences and humanities Advanced students and professionals across philosophy social and political theory and the humanities will find this a compelling and controversial book

**Naturalism and Social Science** David Thomas, 1980-01-24 This 1979 text addresses the ways in which the dominant theories in large areas of Western social science have been subject to strong criticisms particularly of their supposed philosophical deficiencies In the philosophy of science this resulted in empiricist views being replaced by an emphasis on the potential obstinacy of theory in the face of the empirical world After introducing this contemporary philosophy of science Dr Thomas uses it to argue that social study can both retain the natural scientific commitment to the constraint of the external world and assimilate the sorts of philosophical criticisms that were made of the old social scientific theories In particular he shows that social study understood in terms of the new philosophy of science can give an account of the former's distinctive concerns with issues of the meaning and value of social life Dr Thomas supports his abstract arguments by detailed case studies

**Hermeneutic Philosophies of Social Science** Babette Babich, 2017-10-23 Hermeneutic philosophies of social science offer an approach to the philosophy of social science foregrounding the human subject and including attention to history as well as a methodological reflection on the notion of reflection including the intrusions of distortions and prejudice Hermeneutic philosophies of social science offer an explicit orientation to and concern with the subject of the human and social sciences Hermeneutic philosophies of the social science represented in the present collection of essays draw inspiration from Gadamer's work as well as from Paul Ricoeur in addition to Michel de Certeau and Michel Foucault among others Special attention is given to Wilhelm Dilthey in addition to the broader phenomenological traditions of Edmund Husserl and Martin Heidegger as well as the history of philosophy in Plato and Descartes The volume is indispensable reading for students and scholars interested in epistemology philosophy of science social social studies of knowledge as well as social studies of technology

**Reading between the lines - Leo Strauss and the history of early modern philosophy** Winfried Schröder, 2015-11-13 Since its publication in 1952 Leo Strauss's *Persecution and the Art of Writing* has stirred considerable controversy particularly among historians concerned with early modern philosophy On the one hand several scholars share his view that it would be inadequate to generally take at face value the explicit message of

texts which were composed in an era in which severe sanctions were imposed on those who entertained deviating views Reading between the lines therefore seems to be the appropriate hermeneutical approach On the other hand the risks of such an interpretative maxim are more than obvious as it might come up to an unlimited license to ascribe heterodox doctrines to early modern philosophers whose manifest teachings were in harmony with the orthodox positions of their time The contributions to this volume both address these methodological issues and discuss paradigmatic cases of authors who might indeed be candidates for a Straussian reading between the lines Hobbes Spinoza and Bayle [Explorations in Austrian Economics](#) Roger Koppl, 2008-11-12 Features papers presented at the inaugural Wirth Institute Conference on the Austrian School of Economics This work explores issues in economic policy applied economics and pure theory from a variety of perspectives

**Apocalyptic Phenomenology** Balázs M. Mezei, 2025-11-28 This book provides a detailed view of the author's conception of apocalyptic phenomenology referring to the revelatory and self disclosing nature of phenomenological thinking a thinking that is central to our philosophical traditions today The concept of apocalyptic phenomenology i e a phenomenological theology that discloses the ultimate ground of being God in the form of divine revelation is original At the same time it is rooted in the phenomenological tradition of Offenbarung revelation revealing as the basic feature of phenomena In the author's view reality is self disclosing apocalyptic and thus he explains the connections between the original biblical notion of apocalupsis and the important developments of our philosophical traditions leading up to the theological turn of phenomenology The chapters are framed around a focus on newness and engage with the work of key thinkers such as Edmund Husserl Martin Heidegger Paul Ricœur Hans Urs von Balthasar and Anton Günther Apocalyptic Phenomenology will be of interest to scholars of both theology and philosophy [Hegel's Hermeneutics](#) Paul Redding, 1996 An advance on recent revisionist thinking about Hegelian philosophy this book interprets Hegel's achievement as part of a revolutionary modernization of ancient philosophical thought initiated by Kant In particular Paul Redding argues that Hegel's use of hermeneutics an emerging way of thinking objectively about intentional human subjects overcame the major obstacle encountered by Kant in his attempt to modernize philosophy The result was the first genuinely modern hermeneutic and nonmetaphysical philosophy Redding describes Hegel's accomplishment in terms of a development of Kant's revolution in philosophy a Copernican revolution analogous to that which initiated modern science He shows how the heterodox pantheistic views and hermeneutic social thought that merged at the end of the eighteenth century provided a fruitful environment for the transformation that Kantian idealism underwent within the work of Schelling and the early Hegel He argues that Hegel overcame Schelling's pantheistic metaphysics with the Phenomenology of Spirit and developed a postmetaphysical hermeneutic mode of philosophy Redding goes on to show how the social theory of Hegel's Philosophy of Right and the conceptual structures of his allegedly most metaphysical work the Science of Logic are systematically linked to the hermeneutic insights of the Phenomenology Against this background Hegel's works are freed from traditional

misunderstandings Redding demonstrates that Hegel's analyses of modernity and the modern state surpass the one sided views of Adam Smith and Jean Jacques Rousseau providing a coherent framework for modern social and political thought

Critical Systems Thinking Robert L. Flood, Michael C. Jackson, 1991-12-20 This volume contains a collection of essays on the use of systems in the management sciences The text provides an historical overview gives the methodological foundation of systems and explores contemporary critical systems theory and practice

Hermeneutics and the Natural Sciences

Robert P. Crease, 2012-12-06 This remarkable volume attests to the world wide development of a hermeneutical approach to the natural sciences Questions raised by the essays include What is a phenomenology of scientific perception How does meaning arise out of laboratory situations How do individuals or groups come to terms with the particular problem situations in which they find themselves by drawing on the available conceptual and practical resources which structure these situations The essays are organized around three central themes One group of authors Heelan Kockelmanns and Gremmen Jacobs recalls and applies existing historical resources of hermeneutical phenomenology to current scientific and social issues A second group Kisiel Eger considers the differences between a specifically hermeneutical approach to science and related approaches such as cultural studies and social constructivism A third group Ihde Gendlin seeks to forge new directions and tools for understanding natural scientific practice As Crease's introductory essay makes plain the authors share the commitment of hermeneutical philosophy to the priority of meaning over technique the primacy of the practical over the theoretical and the priority of situation over abstract formulation In the process the authors revive and transform the ancient Greek idea that the key to living well to being fully and authentically human resides primarily in the exercise of the practical not the theoretical virtues in the art of doing well in the workworld and acting well in the polis

Toward a Critical Administrative Theory

William N. Dunn, Bahman Fozouni, 1976 The Philosophy of Paul Ricoeur Lewis Edwin Hahn, 1995 Paul Ricoeur widely regarded as the foremost living phenomenologist has helped to make the term hermeneutics a household word His writings cover a wide range of topics from the history of philosophy literary criticism and aesthetics to metaphysics ethics religion semiotics linguistic structuralism and psychoanalysis Ricoeur's most important works including Freedom and Nature Freud and Philosophy The Conflict of Interpretations Time and Narrative The Symbolism of Evil and Oneself as Another have attracted enthusiastic readers from many disciplines and from every major cultural milieu across the surface of the globe
