Norris, 2021-02-16 Recreate the wild beauty and thriving ecology of meadows prairies woodlands and streamsides in your own garden In New Naturalism horticulturist and modern plantsman Kelly D Norris shares his inspiring ecologically sound vision for home gardens created with stylish yet naturalistic plantings that mimic the wild spaces we covet far from the contrived formal high maintenance plantings of the past Through a basic introduction to plant biology and ecology you ll learn how to design and grow a lush thriving home garden by harnessing the power of plant layers and palettes

defined by nature not humans. The next generation of home landscapes don't consist of plants in a row pruned to perfection and reliant on pesticides, fertilizers and herbicides to survive. Instead today's stunning landscapes convey nature's inherent beauty. These gardens are imbued with romance and emotion yet they have so much more to offer than their gorgeous aesthetics. Naturalistic garden designs such as those featured in this groundbreaking new book contribute to positive environmental change by increasing biodiversity providing a refuge for wildlife and reconnecting humans to nature. In the pages of *New Naturalism* you'll find Planting recipes for building meadows, prairies and other grassland inspired open plantings even in compact urban settings. Nature inspired ways to upgrade existing foundation plantings, shrub beds and flower borders to a wilder aesthetic while still managing the space. Inspiration for taking sidewalk and driveway plantings and turning them into visually soft welcoming spaces for humans and wildlife alike. Ideas for turning shady landscapes into canopied retreats that celebrate nature. Creative ways to make an ecologically vibrant garden in even the smallest of spaces. *New Naturalism* approaches the planting beds around our homes as ecological systems. If properly designed and planted these areas can support positive environmental change, increase plant and animal diversity and create a more resilient space that's less reliant on artificial inputs. And they do it all while looking beautiful and improving property values. [Garden and Forest](#) Charles Sprague Sargent, 1895. A journal of horticulture, landscape art and forestry.
