Dark Side of Nature Barbara Jean Larson, 2005 The artist will always be a special isolated solitary agent with an innate sense of organising matter Odilon Redon Disturbing hallucinatory words that evoke pathology rather than history have long framed our understanding of Odilon Redon 1840 1916 a French artist admired by the Surrealists as a precursor in their exploration of the irrational In this book Barbara Larson takes a radically different view of Redon one that does not attempt to deny him melancholia but does go a long way toward dismantling the paradigm that treats the cult of the irrational as the essential condition of his work Larson instead contends that Redon should be seen as a gifted mediator of a context in which new scientific ideas mingled with the fears of social and racial decadence widespread in France after the debacle of the Franco Prussian War Larson begins by investigating Redon's early years in the Bordeaux region where he met Armand Clavaud a botanist who encouraged his interest in the mixture of botany geology zoology and landscape studies then called Naturalism Subsequent chapters integrate Redon's concentration upon black and white graphic media and his absorption of Darwin's teachings and new trends in physiology psychology and microbiology All this enables Larson to offer insightful readings of Redon's predilection for bizarre polymorphous forms The Dark Side of Nature demonstrates that at least insofar as Redon is concerned late nineteenth century science meant not positivistic engagement with a stable material world but rather the exploration of vast invisible realms from microbes to electricity With its clear exposition of scientific thought Larson's book will undoubtedly make a significant contribution not only to Redon studies but also to the interdisciplinary study of art and science **Light and Obscurity in Symbolism** Deborah Cibelli, Rosina Neginsky, 2016-01-14 The idea of

light and darkness is one of the central ideas of the Symbolist movement since this is a movement of contrasts It encompasses the major themes of Symbolism such as good and evil beauty and ugliness the visible and the invisible and the divine and the earthly This volume brings together a range of studies in order to understand the notion of light and darkness and a variety of its Symbolist interpretations It also stresses the interdisciplinary nature of the concepts of light and darkness in Symbolism as well as the cohabitation and symbiosis of both which are together or separately at the core of this movement
