## **Nature As Architect:**

*Architecture and Nature* Sarah Bonnemaison,Christine Macy,2003-09-02 Narrated painted and filmed American landscapes have been central to the construction of a national identity This book explores how such rhetorical landscapes have also been designed into the built environment of architecture    **Culture, Architecture and Nature** Sim Van der Ryn,2013-10-30 Gathering his most compelling essays and addresses from the last fifty years in one accessible volume this book looks at the pioneering ideas that underpin Sim Van der Ryn's ecological design philosophy It offers a unique decade by decade retrospective of the key issues in environmental design beginning with the most recent years and looking back to the 1960s With an introductory chapter and further recommended reading for each decade this book is key reading for any architect or designer practising today and students will find a wealth of knowledge with which to support their studies The author's beautiful illustrations painted in a corresponding timescale to the chapters offer further insight into the way he understands the challenges of humanity's stewardship of our planet    **Nature and Architecture** Paolo Portoghesi,2000 This well illustrated text is the result of a research project begun in the 1950s which relates forms of architecture and even more the rules and ideas that have characterized architectural production down the centuries with the forms of nature

*Architecture of Nature* Diana Agrest,2019-01-15 Based on documentation originating in the environmental sciences history of science philosophy and art *Architecture of Nature* explores the materiality and the effects of the forces at play in the history of the earth through the architect's modes of seeing and techniques of representation This book presents the research work developed for the past eight years in the Advanced Research graduate studio *Architecture of Nature* *Nature of Architecture* created and directed by Diana Agrest at the Irwin S Chanin School of Architecture of the Cooper Union *Architecture of Nature* departs from the traditional approach to nature as a referent for architecture and reframes it as its object of study The complex processes of generation and transformations of extreme natural phenomena such as glaciers volcanoes permafrost and clouds are explored through unique drawings and models confronting a scale of space and time that expands and transcends the established boundaries of the architectural discipline    **Architecture Follows**

**Nature-Biomimetic Principles for Innovative Design** Ilaria Mazzoleni,2013-03-21 This full color volume proposes an innovative methodology that uses the functional aspects of nature to inspire improvements in building design and form encouraging designers to apply biomimetic principles to architectural processes The book focuses on the analysis of various animal skins translating the principles of communication thermoregulation water balance and protection into the built environment Illustrating how biomimetic principles can create a more sustainable way of building this is the first time the author's new methodology as well as the 12 case studies has been published    **Design Ecologies** Lisa Tilder,Beth Blotstein,2012-03-20 Contemporary architects are under increasing pressure to offer a sustainable future But with all the focus on green building there has been little investigation into the meaningful connections between architectural design

ecological systems and environmentalism A new generation of architects landscape architects designers and engineers aims to recalibrate what humans do in the world according to how the world works as a biophysical system Design in this sense is a larger concept having to do as much with politics and ethics as with aesthetics and technology This recasting of the green movement for the twenty first century transforms design into a positive agent balancing societal values with environmental needs Design Ecologies is a ground breaking collection of never before published essays and case studies by today s most innovative designers and critics Their design strategies social material and biological run the gamut from the intuitive to the highly technological One essay likens window unit air conditioners in New York City to weeds in order to spearhead the development of potential design solutions Latz Partner s Landscape Park integrates vegetation and industry in an urban park built amongst the monumental ruins of a former steelworks in Duisburg Nord Germany The engineering firm Arup presents its thirty three square mile masterplan for Dongtan Eco City an energy independent city that China hopes will house half a million people by 2050 An essay by designer Bruce Mau leads off a stellar list of emerging designers including Jane Amidon Blaine Brownell David Gissen Gross Max Robert Sumrell and Kazys Varnelis Stephen Kieran and James Timberlake R Sie n Studio 804 and WORKac

**Ian McHarg / Dwelling in Nature** Ian L. McHarg,James Corner,2007-01-25 One of the legendary figures in twentieth century landscape design Ian McHarg transformed the fields of landscape architecture and planning through his personal methodology his unique curriculum at the University of Pennsylvania and his own inspired writing In classic texts such as his landmark 1969 book Design with Nature McHarg painted an incredibly rich and exuberant picture of the organic world while conjuring up a vision of a more wholesome and productive metropolis In this new entry in the popular Conversations with Students series we are proud to make McHarg s never before in print lecture Collaboration with Nature available for the first time Captured on tape in the 1970s the lecture is the sequel to Design with Nature This is a must read for anyone in the fields of landscape architecture environmental science and urban planning

**The Return of Nature** Preston Cohen,Erika Naginski,2014-07-09 The Return of Nature asks you to critique your conception of nature and your approach to architectural sustainability and green design What do the terms mean Are they de facto design requirements Or are they unintended design replacements The book is divided into five parts giving you multiple viewpoints on the role of the relations between architecture nature technology and culture A detailed case study of a built project concludes each part to help you translate theory into practice This holistic approach will allow you to formulate your own theory and to adjust your practice based on your findings Will you provoke change design architecture that responds to change or both Coedited by an architect and a historian the book features new essays by Robert Levit Catherine Ingraham Sylvia Lavin Barry Bergdoll K Michael Hays Diane Lewis Andrew Payne Mark Jarzombek Jean Francois Chevrier Elizabeth Diller Antoine Picon and Jorge Silvetti Five case studies document the work of MOS Architects Michael Bell Architecture Steven Holl Architects George L Legendre and Preston Scott Cohen

*Nature, Landscape, and Building for Sustainability*

William S. Saunders, 2008 The complexity and scale of the environmental problems confronting humanity today provoke a wide range of responses from indifference to anger to creativity. Among a growing number of architects, landscape architects and planners however, these problems have inspired a new vision: sustainability to guide their practices. In *Nature, Landscape and Building for Sustainability*, a diverse group of contributors considers the concept of sustainability both philosophically and practically. Some take a broad view of the divisions between nature and humanity, exploring the incomprehensible scale of human intervention in the natural world, the relationship between how we feel about nature and what we do about it and the commodification of the natural world. Other essays focus on sustainable design practices, sustainability's roots in the American conservation tradition, its utility as a framework for future design practice and the necessity of moving beyond demonstration projects into the mainstream. Together these essays suggest that the gap between the promise and reality of sustainable design, although significant, can be bridged through diligence and practice. Contributors: D. Michelle Addington, Yale; U. John Beardsley, Harvard Graduate School of Design; Albert Borgmann, U. of Montana, Missoula; Peter Buchanan, Peter Del Tredici, Harvard Graduate School of Design; Robert France, Harvard Graduate School of Design; Susannah Hagan, U. of East London; Kristina Hill, U. of Virginia; Catherine Howett, U. of Georgia; Niall Kirkwood, Harvard Graduate School of Design; Lucy R. Lippard, Bill McKibbin, Michael Pollan, Rossana Vaccarino, Vaccarino Associates, St. Thomas; William S. Saunders (editor of *Harvard Design Magazine* and assistant dean for external relations at Harvard University's Graduate School of Design). He is editor of five previous *Harvard Design Magazine Readers* published by the University of Minnesota Press. Robert L. Thayer Jr. is emeritus professor of landscape architecture and founder of the landscape architecture program at the University of California, Davis.

**Artificial Nature Architecture** Luis de Garrido, 2011 Luis de Garrido is pioneering a new architectural concept: Artificial Nature. An artificial eco-system incorporating manmade artefacts and buildings with its own rules and which evolves alongside the natural eco-system.

*Biomimicry in Architecture* Michael Pawlyn, 2019-08-12 When searching for genuinely sustainable building design and technology designs that go beyond conventional sustainability to be truly restorative, we often find that nature got there first. Over 3.5 billion years of natural history have evolved innumerable examples of forms, systems and processes that can be applied to modern green design. For architects, urban designers and product designers, this new edition of *Biomimicry in Architecture* looks to the natural world to achieve radical increases in resource efficiency. Packed with case studies predicting future trends, this edition also contains updated and expanded chapters on structures, materials, waste, water, thermal control and energy, as well as an all-new chapter on light. An amazing sourcebook of extraordinary design solutions, *Biomimicry in Architecture* is a must-read for anyone preparing for the challenges of building a sustainable and restorative future.

*Designing with Nature* Ken Yeang, 1995 A timely, incisive book providing a comprehensive framework for designing buildings that work with nature. Offering a compelling case for ecological design, it provides architects and designers with a full understanding of the impact that their work has on the

natural environment as well as what can be done to mitigate the damage man made structures inflict on the natural environment **Nature's Architect** Jim Crumley,2022-01-01 Sublime writing a genuinely important book Ken Lussey Hundreds of years after their extinction in these isles beavers are back in Britain These highly skilled engineers of the natural world have been reintroduced at several sites across the UK and even as they become established are already having a dramatic effect on our wild landscapes Here leading nature writer Jim Crumley reveals the pioneering lifestyle of these intriguing and secretive creatures and considers the ecological and economic impact of the beaver reintroductions Employing his trademark beautiful prose and empathy for life in the wild Crumley considers the future for Britain's beavers and makes the case for giving them their freedom **Design by Nature** Staffan Bengtsson,Jelena Zetterström,2011 The book takes as its starting point the fact of nature and mankind having seriously renewed their tryst Not since the close of the 19th century has the desire for interaction with nature been as powerful as it is today A whole galaxy of Norwegian architects many of them involved with the National Tourist Route Project and designers are now cultivating this new interconnection between man and his landscape Under the shadow of climate change and excessive consumption a strong passion for originality and roots is now awakening Design by nature tells this exciting story from a Norwegian design perspective The second part of the book covers design and architecture in present day Norway

**Biomimetics for Architecture & Design** Göran Pohl,Werner Nachtigall,2015-10-30 This book provides the readers with a timely guide to the application of biomimetic principles in architecture and engineering design As a result of a combined effort by two internationally recognized authorities the biologist Werner Nachtigall and the architect Göran Pohl the book describes the principles which can be used to compare nature and technology and at the same time it presents detailed explanations and examples showing how biology can be used as a source of inspiration and translated in building and architectural solutions biomimicry Even though nature cannot be directly copied the living world can provide architects and engineers with a wealth of analogues and inspirations for their own creative designs But how can analysis of natural entities give rise to advanced and sustainable design By reporting on the latest bionic design methods and using extensive artwork the book guides readers through the field of nature inspired architecture offering an extraordinary resource for professional architects engineers designers and urban planners as well as for university teachers researchers and students Natural evolution is seen throughout the book as a powerful resource that can serve architecture and design by providing innovative optimal and sustainable solutions

**Evolutionary Architecture** Eugene Tsui,1999-04 This book uncovers the guiding principles behind Tsui's evolutionary approach to explore the many design lessons that can be learned from nature and share the impressive results of their application to architectural projects **Building with Nature** Richard Joseph Neutra,1971 Shows how architect Richard Neutra tried to provide through his architecture a link with the natural world and an environment to enrich the lives of its users **Design with Nature** Ian L. McHarg,1969 This is a new paperback version of a text originally published in 1969

that outlined the principles of urban design from an environmental perspective It should benefit architects urban and regional planners and environmentalists **On The Nature of Things.** Gavin Keeny,2000 Landscape architecture is a unique discipline where art nature and the city converge and enter into an exciting dialogue In the USA the country of vast open plains and spacious towns the great tradition of life in confrontation with nature plays an equally important role in landscape architecture as the acute problems of the built environment or social problems within the community Design methods and practise in landscape architecture form the focus of this book complemented by an analysis of the theoretical aspects of the subject Perceptive portraits of 13 offices span the whole breadth of landscape design from the post ecological utopia of Michael Sorkin New York Vienna to the urban pragmatism of the Roma Design group San Francisco from the ecological approach of the Philadelphia group Andropogon also active in Japan to the minimalist landscape art of Kathryn Gustafson Seattle London Paris The author is a freelance landscape architect in New York His detailed knowledge of the contempo *Wild Design* Kimberly Ridley,2021-11-09 Wild Design celebrates stunning and functional forms in the world of animals plants and other organisms as well as in earth stone and water This illustrated compendium explores structures as intricate as the microscopic jewel like diatoms as flamboyant as the festooned leks of bowerbirds and as mysterious as the underground fungal networks that shape the grand design of forests
