Natures Magic:

Nature's Magic Peter Corning, 2003-05-05 Nature's Magic presents a bold vision of the evolutionary process from the Big Bang to the 21st century Synergy of various kinds is not only a ubiquitous aspect of the natural world but it has also been a wellspring of creativity and the driver of the broad evolutionary trend toward increased complexity in nature and human societies alike But in contrast with the many theories of emergence or complexity that rely on some underlying force or law the Synergism Hypothesis as Peter Corning calls it is in essence an economic theory of biological complexity it is fully consistent with mainstream evolutionary biology Corning refers to it as Holistic Darwinism Among the many important insights that are provided by this new paradigm Corning presents a scenario in which the human species invented itself synergistic behavioral and technological innovations were the pacemakers of our biological evolution Synergy has also been the key to the evolution of complex modern societies he concludes

Natural Magic Renée Bergland, 2026-02-24 A captivating portrait of the poet and the scientist who shared an enchanted view of nature Emily Dickinson and Charles Darwin were born at a time when the science of studying the natural world was known as natural philosophy a pastime for poets priests and schoolgirls The world began to change in the 1830s while Darwin was exploring the Pacific aboard the Beagle and Dickinson was a student in Amherst Massachusetts Poetry and science started to grow apart and modern thinkers challenged the old orthodoxies offering thrilling new perspectives that suddenly felt radical and too dangerous for women Natural Magic intertwines the stories of these two luminary nineteenth century minds whose thought and writings captured the awesome possibilities of the new sciences and at the same time strove to preserve the magic of nature Just as Darwin's work was informed by his roots in natural philosophy and his belief in the interconnectedness of all life Dickinson's poetry was shaped by her education in botany astronomy and chemistry and by her fascination with the enchanting possibilities of Darwinian science Casting their two very different careers in an entirely fresh light Renée Bergland brings to life a time when ideas about science were rapidly evolving reshaped by poets scientists philosophers and theologians alike She paints a colorful portrait of a remarkable century that transformed how we see the natural world Illuminating and insightful Natural Magic explores how Dickinson and Darwin refused to accept the separation of art and science Today more than ever we need to reclaim their shared sense of ecological wonder
