**Early Naval Air Power** Dennis Haslop,2018-01-03 This book examines the British and German approach to

naval air power describing the creation and development of the two naval air service organizations and doctrine. This work provides new insights as to how two naval air services were influenced by internal and political interventions and how each was integrated into the organizational structures of the Royal Navy and the Kaiserlichemarine KM. Both the Admiralty and the KM made substantial alterations to their organizations and doctrine in the process. Principal air doctrines employed are examined chronologically and the application of operational doctrine is described. While they adopted similar air doctrines there were differences in operational doctrine which they addressed according to their different requirements. This book is a comparative study about the development of organization and air power doctrine in the RNAS Royal Naval Air Service and the IGNAS Imperial German Naval Air Service. It investigates public and political interventions and early concepts of air power placing into context the factors which contributed to how naval theorists came to think about the best means of controlling its working medium air space. Ultimately it examines the similarities and differences between the RNAS and IGNAS understanding of naval air power within the broader strategic and theoretical framework of their parent organizations. This book will be of great interest to students of air power, naval power, military history, strategic studies and IR in general.

Flying ,1951    **Air Power, Naval, Military, Commercial** Claude Grahame-White,Harry Harper,1917    **At the Dawn of Airpower** Laurence M Burke,2022-05-15 At the Dawn of Airpower The U S Army Navy and Marine Corps Approach to the Airplane 1907 1917 examines the development of aviation in the U S Army Navy and Marine Corps from their first official steps into aviation up to the United States declaration of war against Germany in April 1917. Burke explains why each of the services wanted airplanes and show how they developed their respective air arms and the doctrine that guided them. His narrative follows aviation developments closely delving deep into the official and personal papers of those involved and teasing out the ideas and intents of the early pioneers who drove military aviation. Burke also closely examines the consequences of both accidental and conscious decisions on the development of the nascent aviation arms. Certainly the slow advancement of the technology of the airplane itself in the United States compared to Europe in this period affected the creation of doctrine in this period. Likewise notions that the war that broke out in 1914 was strictly a European concern reinforced by President Woodrow Wilson's intentions to keep the United States out of that war meant that the U S military had no incentive to keep up with European military aviation. Ultimately however he concludes that it was the respective services inability to create a strong durable network connecting those flying the airplanes regularly, technology advocates with the senior officers exercising control over their budget and organization, technology patrons that hindered military aviation during this period    Naval Air Power William H. Goodale,Army War College (U.S.),1999 Introduction of aircraft over the World War I battlefield forever changed the way in which conflicts were to be fought. Naval air power and force projection capabilities enjoy a distinct and indisputable advantage over other forces. The aircraft carrier Carrier Battle Groups CVBG historically the first forces called upon during a crisis supply our nations leaders with numerous options ranging from

intelligence gathering to strike warfare. The unique characteristics of naval forces provide the capability to react quickly and sustain peacetime or combat operations without the requirement of host nation cooperation. A historical glimpse at the past 10 years can lead one to predict future instability and regional conflict. The CVBG has and will continue to provide options to the National Command Authority. The ability to operate independently combined with the flexibility provided by naval air power offer a combination available to no other country or military.
