Spotify Teardown Maria Eriksson,Rasmus Fleischer,Anna Johansson,Pelle Snickars,Patrick Vonderau,2019-02-12 An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience Spotify provides a streaming service that has been welcomed as disrupting the world of music Yet such disruption always comes at a price Spotify Teardown contests the tired claim that digital culture thrives on disruption Borrowing the notion of teardown from reverse engineering processes in this book a team of five researchers have playfully disassembled Spotify s product and the way it is

commonly understood Spotify has been hailed as the solution to illicit downloading but it began as a partly illicit enterprise that grew out of the Swedish file sharing community Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation raising questions about the ways in which such cultural content as songs books and films are now typically made available online Spotify Teardown combines interviews participant observations and other analyses of Spotify s front end with experimental covert investigations of its back end The authors engaged in a series of interventions which include establishing a record label for research purposes intercepting network traffic with packet sniffers and web scraping corporate materials The authors innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use the company later threatened their research funding Thus the book itself became an intervention into the ethics and legal frameworks of corporate behavior

The Pitchfork 500 Scott Plagenhoef, Ryan Schreiber, 2008-11-11. FROM THE BRAIN TRUST BEHIND PITCHFORKMEDIA.COM THE WEBSITE THE LOS ANGELES TIMES DECLARED AN ESSENTIAL PART OF THE IPO D GENERATION'S LEXICON. A MUST READ. A FRESH GUIDE TO THE 500 BEST SONGS OF THE PAST THIRTY YEARS. Named the best site for music criticism on the web by The New York Times Magazine, Pitchforkmedia.com has become the leading independent resource for music journalism, the place people turn to find out what's happening in new music. Founded in 1995, Pitchfork has developed one of the web's most devoted followings, with more than 1.6 million readers monthly who tune in for daily reviews, news, features, videos, and interviews. In *The Pitchfork 500: Our Guide to the Greatest Songs from Punk to the Present*, Pitchfork offers up their take on the 500 best songs of the past three decades. Focusing on indie rock, Arcade Fire, the Shins, hip-hop, Public Enemy, Jay-Z, electronic, Daft Punk, Boards of Canada, pop, Madonna, Justin Timberlake, metal, Metallica, Boris, and experimental underground music, *Suicide Boredoms* features all new essays and reviews written with the sharp wit and insight for which the site is known. Kicking it off in 1977 with the birth of punk and independent music, *The Pitchfork 500* runs chronologically, with each chapter representing a distinct period and offering a narrative of how the musical landscape of the day influenced its artists. The book opens with David Bowie, Lou Reed, Iggy Pop, Kraftwerk, and Brian Eno, the art-rock godfathers who set the tone and tenor for the next thirty years, and wraps up in the present when bands connect with new audiences through social networking sites and prime-time TV placements, and when a single mp3 can turn a niche indie artist into a global sensation. Sidebars like "Yacht Rock," "Runaway Trainwrecks," "Nanofads," and "Career Killers" call out some far from classic musical trends and identify the guiltiest offenders. Modernizing the music guide format, *The Pitchfork 500* reflects the way listeners are increasingly processing music by song rather than by album. These 500 tracks condense thirty years of essential music into the ultimate chronological playlist, each song advancing the narrative and, by extension, the music itself.

Platforms, Promotion, and Product Discovery Luis Aguiar (Research fellow), Joel Waldfoegel, 2018. Digitization has vastly increased the amount of new music produced and available directly to consumers. While this has levelled the playing field between already prominent and new artists, creators may now be dependent on platform decisions about which songs

and artist to promote With Spotify emerging as a major interactive streaming platform this paper explores the effect of Spotify s playlists on both the promotion of songs and the discovery of music by new artists using four approaches First we examine songs streaming volumes before and after their addition to and removal from major global playlists Second we compare streaming volumes for songs just on and just off algorithmic top 50 playlists Third we make use of cross country differences in inclusion on New Music Friday lists using song fixed effects to explain differences in streaming Fourth we develop an instrumental variables approach to explaining cross country New Music Friday rank differentials based on home bias Being added to Today s Top Hits a list with 18.5 million followers during the sample period raises streams by almost 20 million and is worth between 116 000 and 163 000 Inclusion on New Music Friday lists substantially raises the probability of song success including for new artists *Spotify Music Marketing Rescue, 2020*
