The World's Top Wedding Photographers Bill Hurter,2015-03-17 The material in this book is the result of asking each of the 10 photographers a series of 14 questions carefully designed to get to the heart of the matters of creativity and profitability As each profiled photographer has a distinctive style background and personality the resulting answers will engage inspire and educate readers on all aspects of the task of creating stand out imagery in a field in which only the best survive and thrive

*Celestial Shadows* John Westfall,William Sheehan,2014-11-19 Much of what is known about the universe came from the study of celestial shadows This book looks in detail at the way eclipses and other celestial shadows have given us amazing insights into the nature of the objects in our solar system and how they are even helping us discover and analyze planets that orbit stars other than our Sun A variety of eclipses transits and occultations of the moons of Jupiter and Saturn Pluto and its satellite Charon asteroids and stars have helped astronomers to work out their dimensions structures and shapes even the existence of atmospheres and structures of exoplanets Long before Columbus set out to reach

the Far East by sailing West the curved shadow of the Earth on the Moon during a lunar eclipse revealed that we inhabit a round world a globe More recently comparisons of the sunlit and Earthlit parts of the Moon have been used to determine changes in the Earth's brightness as a way of monitoring possible effects in cloud coverage which may be related to global warming Shadows were used by the Greek mathematician Eratosthenes to work out the first estimate of the circumference of the Earth by Galileo to measure the heights of the lunar mountains and by eighteenth century astronomers to determine the scale of the Solar System itself Some of the rarest and most wonderful shadows of all are those cast onto Earth by the lovely Evening Star Venus as it goes between the Earth and the Sun These majestic transits of Venus occur at most two in a century after the 2012 transit there is not a chance to observe this phenomenon until 2117 while the more common sweep of a total solar eclipse creates one of the most dramatic and awe inspiring events of nature Though it may have once been a source of consternation or dread solar eclipses now lead thousands of amateur astronomers and eclipse chasers to travel the globe in order to experience the dramatic view under totality These phenomena are among the most spectacular available to observers and are given their full due in Westfall and Sheehan's comprehensive study [Leica D-Lux 8 User Guide](#)
