George Frederick Stout,1899 An effective introduction to Psychology must be clothed in living flesh and blood The most essential gift to be imparted to the beginner is a real interest in the subject and a real power of dealing with it even when familiar formulas fail him He ought to be able to do riders in Psychology as he does riders in Euclid It is true that there are students who cannot advance so far from lack of natural endowment But even for them a treatment full enough to be

interesting and so rememberable is better than arid and dogmatic statements Certainly the teacher who needs Psychology for educational purposes would do better to leave the subject alone altogether than to learn it in a merely external way

Tovian,2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book State Manual of the Courses of Study for the High Schools of Oregon ...
