Tested in Grades 3-5 classrooms, the model lessons in this book walk teachers through the process of applying critical frameworks to instruction using standards-based mathematics to explore, understand, and respond to social justice issues. Learn to plan instruction that engages students in mathematics explorations through age-appropriate, culturally relevant topics such as valuing differences, health and pay inequality, bullying, voting rights, and environmental justice. Features include Content cross-referenced by mathematical concept and social issues, Connection to Learning for Justice's social justice standards, Downloadable instructional materials and lesson resources, Guidance for lessons driven by students' unique passions and challenges, Connections between research and practice, Written for teachers committed to developing equitable and just practices through the lens of mathematics content and practice standards, as well as social justice standards, this book will help connect content to students' daily lives, fortify their mathematical understanding, and expose them to issues that will support them in becoming active citizens and leaders.
