## Of Human Sovereignty:

*Of human sovereignty* Arthur Freud, **Definition and development of human rights and popular sovereignty in Europe** Council Of Europe,European Commission for Democracy through Law,2011-04-20 What role do the people play in defining and developing human rights This volume explores the very topical issue of the lack of democratic legitimisation of national and international courts and the question of whether rendering the original process of defining human rights more democratic at the national and international level would improve the degree of protection they afford The authors venture to raise the crucial question When can a democratic society be considered to be mature enough so as to be trusted to provide its own definition of human rights obligations *The Development of Human Rights Law by the Judges of the International Court of Justice* Shiv R.S. Bedi,2007-01-18 The jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICJ's willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court's principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights *Notes on Sovereignty from the Standpoint of the State and of the World* Robert Lansing,1921

**Political Theory and the Animal/Human Relationship** Judith Grant,Vincent G. Jungkunz,2016-03-31 The division of life into animal and human is one of the fundamental schisms found within political societies Ironically given the immense influence of the animal human divide especially upon power dynamics the discipline in charge of theorizing and studying power political science and theory has had little to say about the animal human This book seeks to amend this vast oversight Acknowledging the complexity of the changing differences between animals and humans the contributors explore such topics as Marx Freud the animal and civilization dog breeding racism and democracy the meaningful silences of animals how sovereignty reconfigures the animal human and the paradoxical struggles against being dehumanized among immigrant workers in a slaughterhouse Political Theory and the Animal Human Relationship is necessary reading for anyone who wants

to understand how power has been influenced by the animal human divide and what we can do about it Non-Human Nature in World Politics Joana Castro Pereira,André Saramago,2020-08-26 This book explores the interconnections between world politics and non human nature to overcome the anthropocentric boundaries that characterize the field of international relations By gathering contributions from various perspectives ranging from post humanism and ecological modernization to new materialism and post colonialism it conceptualizes the embeddedness of world politics in non human nature and proposes a reorientation of political practice to better address the challenges posed by climate change and the deterioration of the Earth s ecosystems The book is divided into two main parts the first of which addresses new ways of theoretically conceiving the relationship between non human nature and world politics In turn the second presents empirical investigations into specific case studies including studies on state actors and international organizations and bodies Given its scope and the new perspectives it shares this edited volume represents a uniquely valuable contribution to the field
