**The Invention of Good and Evil** Hanno Sauer,2024-09-17 What makes us moral beings How do we decide what is good and what is evil In the vein of Sapiens comes a grand history of our universal moral values at the moment of their greatest crisis How did we learn to distinguish good from evil Have we always been capable of doing so And will we still be in the world to come In this breathtaking book ethics expert Hanno Sauer offers a great universal history of morality in the era of its darkest crisis He finds that morality existed long before there was talk of God religion or philosophy Its history is first of all the fruit of a process of natural selection going back to the dawn of humanity in the forests of East Africa which five million years ago thinned out owing to climate change Among the early humans that came down from the trees there were also our ancestors who adapted to open spaces by organizing themselves into large groups Under the pressure of environmental factors morality emerges as the foundation for cooperation a quality that is as precarious as it is essential to the survival of the species Moving between paleontology and genetics psychology and cognitive science philosophy and evolutionism Sauer traces a genealogy of morality and along the journey marks the main moral transformations in the history of humanity In the end he concludes that millions of years of stratifications has led to the moral crisis of our present and the only way to build a future together is to retrace our history
