Office Automation A User Driven Method:

   Office Automation Don Tapscott,2013-11-21 Every pioneer takes large risks hoping that the new frontier he seeks will provide the benefits of independence and good fortune Don Tapscott is such a pioneer in the area of office automation He has been a true pioneer having entered the field in its early days and taken the risk of working not in technol ogy which was fashionable but in the field of the problems of organizations which was less fashionable but in many ways more important The utilization of computers for data processing accounting inventory and other bread and butter applications is now well entrenched in our society and culture The process of designing such systems tends to focus on the needs of the company and the constraints of the equipment leading to efficient systems with little tolerance for the variety of people who must use or interface with them Within the office automation area these methods do not work nearly as well The frequency and amount of human interaction in the office environment and the wide variety of situations and reactions there in demands a different design methodology   Advances in Computers ,1995-09-11 Praise for the SeriesMandatory for academic libraries supporting computer science departments CHOICESince its first volume in 1960 Advances in Computers has presented detailed coverage of innovations in computer hardware software theory design and applications It has also provided contributors with a medium in which they can explore their subjects in greater depth and breadth than journal articles usually allow As a result many articles have become standard references that continue to be of sugnificant lasting value in this rapidly expanding field   **Information Technology And Organisational Change** K.D. Eason,2005-08-05 Describes techniques for user centred design of data processing systems for office applications Focuses on human and organisational consequences   **Interactive Media** Roy Rada,2012-12-06 This book was written for students and practitioners of engineering and social sciences including computer information communication library business management and cognitive science The topic is the relationship between people and interactive media The book describes individuals groups and organizations An understanding of people is critical to an understanding of the technology which can help people This book was written with the help of a special computer system for authoring called the Many Using and Creating Hypertext MUCH system Students and researchers from the University of Liverpool contributed to the book through the MUCH system Classes at the University of Liverpool both undergraduate classes and master s degree classes have used various drafts of this book as required reading The book has been available to the students online via the MUCH system and the students have provided helpful feedback for the contents of the book The author is particularly grateful for the contributions of Antonios Michailidis and Alex Birchall Antonios s influence is most prominent in the chapters on groups and Alex s in the latter chapters on organizations Claude Ghaoui coordinated the book authoring and production team and Anthony Deakin provided finishing touches   *Evaluation of Human Work* John R. Wilson,Sarah Sharples,2015-04-16 Written by experts with real world experience in applying ergonomics methodology in a range of contexts Evaluation of Human Work Fourth Edition explores

ergonomics and human factors from a doing it perspective More than a cookbook of ergonomics methods the book encourages students to think about which methods they should apply when and why   Technology and the Transformation of White-collar Work Robert E. Kraut,1987 The introduction of new technology and communication to businesses is forever altering the roles and responsibilities of the white collar workers This unique collection from authors in such diverse disciplines as psychology computer science sociology history communication and public policy discusses the ways in which these changes have and are effecting the workplace and the employees while speculating on future changes and effects Of special significance are the methods suggested for introducing information technology into the workplace These new methods will increase the quality and quantity of goods and services produced while increasing the quality of working life for employees   *Office Automation* ,1987   *Planning for Integrated Office Systems* Don Tapscott,Del Henderson,Morley Greenberg,1985   Information Systems Assessment Niels Bjørn-Andersen,Gordon Bitter Davis,1988 The 21 articles in this book address issues in assessing costs and benefits of information systems both in organizations and at the societal level The topics include both the ex ante assessment of the consequences of alternative information system designs as well as the ex post evaluation of implemented information systems Assessment includes technical economic organizational and social dimensions These are relevant both prior to decisions about acquisition or design and after the organizational implementation This book should make a contribution to the field of information systems assessment The articles are likely to be relevant for a long period due to the high level of theoretical content and should also have an increasing relevance over time because the potential of information technology to result in changes for the better or for the worse will increase as more complex systems are implemented Accordingly it will become even more pertinent to understand and assess the likely consequences of the information systems being designed and implemented before taking irreversible steps The articles are grouped into three sections   **Groupware** Robert Johansen,1988 As the personal computer expands into the interpersonal computer this ground breaking book shows how groupware can revolutionize the task focused deadline driven work of business teams   **Designing Information Systems Security** Richard Baskerville,1988 This book addresses the uses and practical aspects of the analysis design and specification of information systems security and will represent the intersection of the work in computer security and current work in systems analysis and auditing   **ACM Transactions on Office Information Systems** ,1985   *Computer-based Message Services* Hugh T.
