Oculomotor Systems and Perception Sheldon M. Ebenholtz,2001-08-27 Oculomotor systems that regulate eye movements play an important role in accounting for certain qualities of visual experience They are implicated in a wide array of perceptual topics from apparent size depth and distance to apparent slant and vertical orientation This text emphasizes the role of oculomotor systems in perception and discusses the basic characteristics of such oculomotor systems as those controlling vergence pursuit the vestibulo ocular response and saccadic eye movements This volume introduces fundamental concepts in physiological optics and explores the mechanisms of perception with a focus on eye movements and the diverse implications of oculomotor research [The Influence of Oculomotor Systems on Visual Perception](#) Whitman Richards,1969 The report summarizes work on the influence of the influence of the oculomotor systems upon perception Two general problems were considered saccadic suppression and size scaling Of particular interest is whether or not efferent or outflow mechanisms play a significant role in these perceptual phenomena Author

Sensorimotor Interactions in Space Perception and Action D. G. Bouwhuis,Don G. Bouwhuis,1987 This volume provides a unique sample of research and conceptual approaches to understanding the interactive nature of perceptual and motor processes In addition to diverse views from experimental psychology the reader will find contributions from biological cybernetics neurology and ophthalmology Starting with an introduction to the historical development of the problem the first section is concerned with the contribution of efferent processes to visual space perception Subsequent sections discuss different theoretical approaches to the interrelationship of space perception and action phenomena and mechanisms of oculomotor and perceptual adaptation as well as the development of perceptual motor performance [The Influence of the Oculomotor System on Active Scene Perception](#) Fabian Schnier,2011 [Research Awards Index](#) ,1989 **Sensory Experience, Adaptation, and Perception** Ivo Kohler,1984 First Published in 1983 Routledge is an imprint of Taylor Francis an informa company [Biomedical Index to PHS-supported Research: pt. Sensation and Perception Stanley Coren, Lawrence M. Ward, James T. Enns, 1994 This highly acclaimed book provides a theoretically balanced introduction to the study of basic physiology and sensory responses. The authors survey a broad range of topics and present different theories and perspectives in controversial areas. Demonstrations allow the reader to experience many of the perceptual phenomena firsthand using common household items or illustrations in the book. Describes natural instances of perceptual phenomena to bring the subject matter to life. **Analysis of Visual Behavior** David Ingle, Melvyn A. Goodale, Richard J. W. Mansfield, 1982 Analysis of Visual Behavior encompasses both theoretical and experimental research. It deals with the visual mechanisms of diverse vertebrate species from salamanders and toads to primates and humans and presents a stimulating interaction of the disciplines of anatomy, physiology and behavioral science. Throughout visual mechanisms are investigated from the point of view of the brain functioning at the organismic level as opposed to the now more prevalent focus on the molecular and cellular levels. This approach allows researchers to deal with the patterns of visually guided behavior of animals in real life situations. The twenty six contributions in the book are divided among three sections: Identification and Localization Processes in Nonmammalian Vertebrates introduced by David J. Ingle, Visual Guidance of Motor Patterns, The Role of Visual Cortex and the Superior Colliculus introduced by Melvyn A. Goodale and Recognition and Transfer Processes introduced by Richard J. W. Mansfield. The editors are all university researchers in psychology: David J. Ingle at Brandeis, Melvyn A. Goodale at the University of Western Ontario and Richard J. W. Mansfield at Harvard.
