Lopez, 1994-08-01 The Maple Summer Workshop and Symposium MSWS 94 reflects the growing community of Maple users around the world This volume contains the contributed papers A careful inspection of author affiliations will reveal that they come from North America Europe and Australia In fact fifteen come from the United States two from Canada one from

Australia and nine come from Europe Of European papers two are from Germany two are from the Netherlands two are from Spain and one each is from Switzerland Denmark and the United Kingdom More important than the geographical diversity is the intellectual range of the contributions We begin to see in this collection of works papers in which Maple is used in an increasingly flexible way For example there is an application in computer science that uses Maple as a tool to create a new utility There is an application in abstract algebra where Maple has been used to create new functionalities for computing in a rational function field There are applications to geometrical optics digital signal processing and experimental design

Introduction to Maple Andre HECK, 2012-12-06 The first edition of this book has been very well received by the community The new version 4 of Maple V contains so many new mathematical features and improvements in the user interface that Waterloo Maple Inc markets it as the Power Edition These two facts have made it necessary to write a second edition within a short period of the first I corrected typographical errors rephrased text updated and improved many examples and added much new material Hardly any chapter has been left untouched Substantially changed or added sections and chapters address the assume facility I/O approximation theory integration composite data types simplification graphics differential equations and matrix algebra Tables summarize features command options etc and constitute a quick reference The enlarged index of the book has been carefully compiled to make locating search items quick and easy Many new examples have been included showing how to use Maple as a problem solver how to assist the system during computations and how to extend its built-in facilities About the Maple Version Used The second edition of this book is fully revised and updated to Maple V Release 4 More precisely the second edition of this book was produced with Maple V Release 4 beta 3 on a SUN SPARCstation 20 Model 71 There should be hardly any difference between this beta version and the final release only minor differences in the user interface are not excluded **The Bulletin of Mathematics Books**, 1992
