Suda, 2012 This is the age of the virtual project leader in fact today it is actually rare to lead a team that is physically located in one place. Projects propel someone somewhere to lead a project to successful completion. This may be the result of a global merger, acquisition, new partnership, alliance, or joint venture and new projects and services launched globally. It is not even uncommon to find a person who manages a functional area like human resources to find that they are also virtual team leaders on new organizational initiatives. This paper discusses training virtual teams and using project simulations. It begins by defining a virtual team and looks at their needs. Next it examines tasks and social dynamics for virtual teams and lists tasks and social stages and the issues associated with each. It identifies the four task stages associated with task dynamics. Then the paper explains how project simulations help build virtual team competencies. It suggests a team learning model and

shows how project simulations can help The paper concludes by listing several ways that the conceptual framework presented can contribute to virtual team learning *The Book of Nehemiah Study Guide English* Spring of Water International Ministries,2018-04 **Virtual Teams** Terri R.
