

A black and white photograph of a person lying down, looking towards a fireplace with two lit candles.

Mortal questions

THOMAS NAGEL

Mortal Questions

J Dewey

Mortal Questions:

Mortal Questions Thomas Nagel, 2012-03-26 Thomas Nagel's *Mortal Questions* explores some fundamental issues concerning the meaning, nature, and value of human life. Questions about our attitudes to death, sexual behaviour, social inequality, war, and political power are shown to lead to more obviously philosophical problems about personal identity, consciousness, freedom, and value. This original and illuminating book aims at a form of understanding that is both theoretical and personal in its lively engagement with what are literally issues of life and death. [Mortal Questions \(Canto Classics\)](#)

Thomas Nagel, 2012-03-26 Preface Sources 1 Death 2 The absurd 3 Moral luck 4 Sexual perversion 5 War and massacre 6 Ruthlessness in public life 7 The policy of preference 8 Equality 9 The fragmentation of value 10 Ethics without biology 11 Brain bisection and the unity of consciousness 12 What is it like to be a bat 13 Panpsychism 14 Subjective and objective Index

Mortal Questions Thomas Nagel, 1991

After Philosophy Kenneth Baynes, James Bohman, Thomas A. McCarthy, Thomas McCarthy, 1987 *After Philosophy* provides an excellent framework for understanding the most important strains of current philosophical work in North America, England, France, and Germany. The selections from the work of fourteen contemporary philosophers not only display the multiplicity of approaches being pursued since the breakup of any consensus on what philosophy is but also help to clarify this proliferation of views and to spell out today's basic options for doing or not doing philosophy today. With a general introduction delineating what is in dispute between the different parties to the end of philosophy debates, brief introductions to the thought of each author, and suggestions for further reading following each selection, *After Philosophy* is ideally suited for use in any course that includes an overview of the bewildering variety of contemporary approaches to philosophy. The major sections and contributors are: I The End of Philosophy: Richard Rorty, Jean-François Lyotard, Michel Foucault, Jacques Derrida. II The Transformation of Philosophy: Systematic Proposals: Donald Davidson, Michael Dummett, Hilary Putnam, Karl-Otto Apel, Jürgen Habermas. III The Transformation of Philosophy: Hermeneutics, Narrative, Rhetoric: Hans-Georg Gadamer, Paul Ricoeur, Alasdair MacIntyre, Hans Blumenberg, Charles Taylor. Kenneth Baynes is currently doing postgraduate research at the University of Frankfurt. James Bohman lectures in philosophy at Boston University, and Thomas McCarthy is a professor of philosophy at Northwestern University and the editor of the MIT Press series *Studies in Contemporary German Social Thought*.

The Eternal Question Allen Clarke, 1919

From Eden to Interstellar Space Sarah Anne Beattie, 2025-01-23 This book is a response to two questions. The first concerns how we can do better as human beings in addressing the broken relationships between humankind, the environment in which we live, and the other species with which we coexist in an increasingly fragile world. The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective transformational action. The book explores the possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary

rather than competing supplement to developing scientific perspectives of reality These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live

Sport, Play, and Ethical Reflection Randolph Feezell, Randolph M. Feezell, 2006-09 In paperback for the first time Randolph Feezell's *Sport Play and Ethical Reflection* immediately tackles two big questions about sport What is it and Why does it attract so many people Feezell argues that sports participation is best described as a form of human play and the attraction for participants and viewers alike derives from both its aesthetic richness and narrative structure He then claims that the way in which sports encourage serious competition in trivial pursuits is fundamentally absurd and therefore participation requires a state of irony in the participants where seriousness and playfulness are combined Feezell builds on these conclusions addressing important ethical issues arguing that sportsmanship should be seen as a kind of Aristotelian mean between the extremes of over and under investment in sport Chapters on cheating running up the score and character building stress sport as a rule governed tradition bound practice with standards of excellence and goods internal to the practice With clear writing and numerous illuminating examples Feezell demonstrates deep insight into both of his subjects

Political Obligation in Its Historical Context John Dunn, 2002-04-11 Mr Dunn addresses the central questions of political philosophy from an unusually broad variety of perspectives

Embodied Minds in Action Robert Hanna, Michelle Maiese, 2009-01-08 In *Embodied Minds in Action* Robert Hanna and Michelle Maiese work out a unified treatment of three fundamental philosophical problems the mind body problem the problem of mental causation and the problem of action This unified treatment rests on two basic claims The first is that conscious intentional minds like ours are essentially embodied This entails that our minds are necessarily spread throughout our living organismic bodies and belong to their complete neurobiological constitution So minds like ours are necessarily alive The second claim is that essentially embodied minds are self organizing thermodynamic systems This entails that our mental lives consist in the possibility and actuality of moving our own living organismic bodies through space and time by means of our conscious desires The upshot is that we are essentially minded animals who help to create the natural world through our own agency This doctrine the Essential Embodiment Theory is a truly radical idea which subverts the traditionally opposed and seemingly exhaustive categories of Dualism and Materialism and offers a new paradigm for contemporary mainstream research in the philosophy of mind and cognitive neuroscience
