Disease Control Priorities in Developing Countries Dean T. Jamison,Joel G. Breman,Anthony R.

Measham,George Alleyne,Mariam Claeson,David B. Evans,Prabhat Jha,Anne Mills,Philip Musgrove,2006-04-02 Based on careful analysis of burden of disease and the costs of interventions this second edition of Disease Control Priorities in Developing Countries 2nd edition highlights achievable priorities measures progress toward providing efficient equitable care promotes cost effective interventions to targeted populations and encourages integrated efforts to optimize health Nearly 500 experts scientists epidemiologists health economists academicians and public health practitioners from around the world contributed to the data sources and methodologies and identified challenges and priorities resulting in this integrated comprehensive reference volume on the state of health in developing countries The Tobacco Epidemic C. T. Bolliger,K. O.

Fagerström,F.J.F. Herth,1997-10-20 Today it is a well established fact that cigarette smoking is fundamentally a form of addiction to the drug nicotine However this does not mean that smoking can entirely be explained in terms of pharmacological factors as with any drug addiction social economic personal and political influences all play an important part in determining patterns of prevalence and cessation This publication provides a comprehensive up to date review of tobacco smoking Written by internationally acknowledged experts the 15 chapters of the book cover the history economics epidemiology and psychology of tobacco use The medical consequences of both active and passive smoking are discussed in detail and the pharmacological and behavioral aspects of nicotine dependence are highlighted Several chapters focus on smoking cessation examining patterns and predictors of cessation in the general population and the role of GPs nurses and pharmacists and evaluating nicotine replacement therapy and other drugs as well as the role of smokeless tobacco Measures to prevent smoking such as smoke free environments advertising bans and price increases are also considered Finally recommendations are given to change legislation concerning tobacco products in order to most effectively reduce the harm associated with nicotine use This book is a must for anyone in the medical profession interested in smoking related issues Due to its easy readability and topicality it will also appeal to nonmedical readers A Karger Publishing Highlights 1890 2015 title

Geography of Deprivation Bimalendu Bhattacharya,2014-01-01 Poverty Hunger and Malnutrition worldwide are the major focus of this book taken up as the principal areas of human deprivation with wide geographical variations as determined by different factors Gender discrimination in its various manifestations and child abuse also feature very prominently as other forms of deprivation corroding life and attitudes of people requiring very serious concern to deal with the prevailing humiliating situation along with an assessment of the earth's capability of redressing human suffering through poverty and hunger Tobacco and Health K. Slama,2012-12-06 Over 1 100 delegates from a hundred countries

attended the 9th World Conference on Tobacco and Health. After five days of debate, several important resolutions were adopted unanimously and will be landmarks in the fight against tobacco. This great success is due to three facts which emerged from the discussions:

1. It appears clearly now that the risks associated with tobacco are much greater than previously assumed. Out of two regular smokers, one will die from a tobacco-related disease.
2. Reducing tobacco consumption can be achieved, but the data collected in several countries show that it requires a global strategy. This strategy was much debated during the conference.

The resolutions adopted emphasize the agreement of the delegates on the main points of action to fight the growing epidemic of tobacco-attributable disease and death. This involves convincing the general public, the medical community, and decision makers of the need to act for tobacco control. The most efficient tools for helping individuals never to start or successfully to stop using tobacco should be developed. Effective tobacco control endeavors are required to counteract the actions of the powerful and influential tobacco manufacturers. With the help and under the aegis of WHO, DICC, IUATLD, ISFC, IOCD, and IUHPE, an international alliance for health and against tobacco should unite all those who are engaged in this fight.

Curbing the Epidemic Prabhat Jha, Frank J. Chaloupka, 1999-01-01. Annotation: Addresses important economic and social issues confronting policymakers when dealing with the issue of tobacco control and its impact on the social and economic resources of both developed and developing countries.
