Pearson,2005 The present monograph concerns with the invariant subspace problem within the context of families of linear bounded operators on Banach spaces as well as families of positive operators on Banach lattices Although it is primarily based on the PhD thesis of the author the monograph provides further results and information on recent advances about the topic The general invariant subspace problem concerns linear and bounded operators on infinite dimensional complex Hilbert spaces and asks whether there exists a closed subspace different than the trivial ones that is mapped to itself by such an operator The picture that emerged after oodles of different attempts for a possible solution to this problem for a single operator has been the subject matter of an extensive amount of research over more than seven decades and it was only in the late 1990s that the reformulation of the invariant subspace problem for families of operators rather than a single one attracted the mathematical community s growing attention In this book we are interested in giving some results concerning the invariant subspace problem for special families of operators     **The Gospel according to st. **To Believe or Not to Believe** Jack Perkins, DMin. LADC,2022-10-12 Research has shown there is a great divide between the church and the unaffiliated to include those who tend toward atheism This concern inspired the author to step away from full time ministry to work as a counselor in a state owned and operated residential facility to better understand the thought processes of those who are not invested in Christianity He became aware of an us versus them mindset held by some Christians this attitude has resulted in Christians drawing a tight circle around themselves that has created a barrier

for reaching those not affiliated with the church There are several consequences First it has resulted in a deep decline in baptisms and church affiliation for churches less than 50 percent of Americans surveyed are members of a church Second it has resulted in Christians believing there is no hope for those outside the church Third the gospel presentation utilized by many is to continually make jabs at the unaffiliated bordering on a scare tactic Too many churches have attempted to use revival era styles of evangelism contemporary approaches and or a social perspective however the chasm has widened This book takes an in depth look at the philosophical systems that keep people from embracing Christianity The author also provides a theological model for helping others understand a theological base for the Christian worldview The greatest contribution of the book is the way it offers hope for reaching the unaffiliated and provides practical ways of connecting with those outside the church
