## **Lore Capturing Traditional Environmental Knowledge:**

*Lore* Martha Johnson, 1992 This book examines the process of collecting traditional environmental knowledge while using a participatory action or community based approach. It looks at the problems associated with documenting traditional knowledge problems that are shared by researchers around the world and it explores some of the means by which traditional knowledge can be integrated with Western science to improve methods of natural resource management. Includes the Dene of the Mackenzie Valley Northwest Territories and the Inuit of Sanikiluaq Belcher Islands. **Human Ecology** Daniel G.

Bates, Judith Tucker, 2010-03-29 This book arose from the need to develop accessible research based case study material which addresses contemporary issues and problems in the rapidly evolving field of human ecology. Academic political and indeed public interest in the environmental sciences is on the rise. This is no doubt spurred by media coverage of climate change and global warming and attendant natural disasters such as unusual drought and flood conditions, toxic dust storms, pollution of air and water and the like. But there is also a growing intellectual awareness of the social causes of anthropogenic environmental impacts, political vectors in determining conservation outcomes and the role of local representations of ecological knowledge in resource management and sustainable yield production. This is reflected in the rapid increase of ecology courses being taught at leading universities in the fast growing developing countries much as was the case a decade or two ago in Europe and North America. The research presented here is all taken from recent issues of **Human Ecology: An Interdisciplinary Journal**. Since the journal itself is a leading forum for contemporary research the articles we have selected represent a cross section of work which brings the perspectives of human ecology to bear on current problems being faced around the world. The chapters are organized in such a way to facilitate the use of this volume either to teach a course or to introduce an informed reader to the field. **Indigenous Education** Huia Tomlins-Jahnke, Sandra D. Styres, Spencer Lilley, Dawn Zinga, 2019-07-11 For Indigenous students and teachers alike formal teaching and learning occurs in contested places. In Indigenous Education leading scholars in contemporary Indigenous education from North America, New Zealand and Hawaii disentangle aspects of colonialism from education to advance alternative philosophies of instruction. From multiple disciplines contributors explore Indigenous education from theoretical and applied perspectives and invite readers to embrace new informed ways of schooling. Part of a growing body of research this is an exciting powerful volume for Indigenous and non Indigenous teachers, researchers, policy makers and scholars and a must read for anyone who wants to understand the contested spaces of contemporary education. Foreword by Linda Tuhiwai Smith. Contributors: Jill Bevan Brown, Frank Deer, Wiremu Doherty, Dwayne Donald, Ngarewa Hawera, Margie Hohepa, Robert Jahnke, Patricia Maringi, G. Johnston, Spencer Lilley, Daniel Lipe, Margaret J. Maaka, Angela Nardozi, Katrina Ann R.
