Lost Worlds:

Lost Worlds Bruce M. Beehler, 2008-10-01 Perhaps it is not possible to experience all the mysterious sounds the unfamiliar smells and the spectacular sights of a tropical rainforest without ever visiting one. But this exhilarating and honest book comes wondrously close to taking the reader on such a journey. Bruce M. Beehler, a widely traveled expert on birds and tropical ecology, recounts fascinating details from twelve field trips he has taken to the tropics over the past three decades. As a researcher, he brings to life the exotic rainforests and the people who inhabit them. As a conservationist, he makes a plea for better ways of managing rainforests, a resource that the world cannot do without. Drawing on his experiences in Papua New Guinea, India, Madagascar, Indonesia, the Philippines, Panama, and the Ivory Coast, Beehler describes the surprises both pleasant and unpleasant of doing science and conservation in the field. He explains the role that rainforests play in the lives of indigenous peoples and the crucial importance of understanding local cultures, customs, and politics. The author concludes with simple but tough solutions for maintaining rainforest health, expressing fervent hope that his great grandchildren and others may one day also hear the rainforest whisper its secrets.

New Worlds, Lost Worlds Susan Brigden, 2002-09-24 No period in British history has more resonance and mystery today than the sixteenth century. *New Worlds, Lost Worlds* brings the atmosphere and events of this great epoch to life. Exploring the underlying religious motivations for the savage violence and turbulence of the period from Henry VIII's break with Rome to the overwhelming threat of the Spanish Armada, Susan Brigden investigates the actions and influences of such near mythical figures as Elizabeth I, Thomas More, Bloody Mary, and Sir Walter Raleigh. Authoritative and accessible, *New Worlds, Lost Worlds*, the latest in the Penguin History of Britain series, provides a superb introduction to one of the most important, compelling, and intriguing periods in the history of the Western world.

Lost worlds Leonard Cottrell, 1961 *Lost Worlds*, 2007 **Arthur C. Clarke** Gary Westfahl, 2018-06-14 Already renowned for his science fiction and scientific nonfiction, Arthur C. Clarke became the world's most famous science fiction writer after the success of *2001: A Space Odyssey*. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise* that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career, ranging from his forgotten juvenilia to the passages he completed for a final novel, *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent, solitary individuals who avoid conventional relationships represent his most significant prediction of the future, as they embody the increasingly common lifestyle of people in the twenty-first century.
