Comparative Anatomy and Phylogeny of Primate Muscles and Human Evolution Rui Diogo,Bernard A. Wood,2012-01-11 This book challenges the assumption that morphological data are inherently unsuitable for phylogeny reconstruction argues that both molecular and morphological phylogenies should play a major role in systematics and provides the most comprehensive review of the comparative anatomy homologies and evolution of the head neck pectoral and upper limb muscles of primates Chapters 1 and 2 provide an introduction to the main aims and methodology of the book Chapters 3 and 4 and Appendices I and II present the data obtained from dissections of the head neck pectoral and upper limb muscles of representative members of all the major primate groups including modern humans and compare these data with the information available in the literature Appendices I and II provide detailed textual attachments innervation function variations and synonyms and visual high quality photographs information about each muscle for the primate taxa included in the cladistic study of Chapter 3 thus providing the first comprehensive and up to date overview of the comparative anatomy of the head neck pectoral and upper limb muscles of primates The most parsimonious tree obtained from the cladistic analysis of 166 head neck pectoral and upper limb muscle characters in 18 primate genera and in representatives of the Scandentia Dermoptera and Rodentia is fully congruent with the evolutionary molecular tree of Primates thus supporting the idea that muscle characters are particularly useful to infer phylogenies The combined anatomical materials provided in this book point out that modern humans have fewer head neck pectoral and upper limb muscles than most other living primates but are consistent with the proposal that facial and vocal communication and specialized thumb movements have probably played an important role in recent human evolution This book will be of interest to primatologists comparative anatomists functional morphologists zoologists physical anthropologists and systematicians as well as to medical students physicians and researchers interested in understanding the origin evolution homology and variations of the muscles of modern humans Contains 132 color plates **Munsey's Magazine** ,1928 *Chambers's Encyclopedia* ,1874 *Essex Institute Historical Collections* Essex Institute,1912 *Sabbathum Veteris et Noui Testamenti: or, The true doctrine of the Sabbath ... plainly laid foorth and now ... the second time perused, and enlarged, etc* Nicholas BOWND,1606 **Cassell's Magazine, Illustrated** ,1906 **Brehm's Life of Animals** Alfred Edmund Brehm,1896 *Social Progress* ,1926 *The Saturday Evening Post* ,1918 **The War Correspondence of the "Daily News," 1877** ,1878 **The War Correspondence of the Daily News, 1877** Archibald Forbes,Januarius Aloysius MacGahan,1878 **Acts and Joint Resolutions of the General Assembly of the State of South Carolina** South Carolina,1916 Acts for 1849 and 1855 contain Senate and House journals *The War Correspondance of the "Daily News", 1877: with a Connecting Narrative Forming a Continuous History*
